

Moodboard

Year	2018
Designer	Massimo Mariani

For his first designs for Acerbis, Massimo Mariani applied the materially-focused approach that won him the Compasso d'Oro to create a truly exceptional line of versatile coffee tables of mixed and contrasting materials. Also available as sideboards, the Moodboard collection is a line of low tables in various sizes and shapes, with tops in a mix of wood, marble, polished steel, and brass, creating a mosaic of materials, colors, and textures. Easy to combine to create larger islands of tables for bigger groups, a polished steel or brass tray can be added as a valet or utility tray, which also functions as an integral part of the design and structure when not in use.

Dimensions

Finishes

Top in the following versions:
