EOTec 2000

2A16 Power Supply Module

The 2A16 Power Supply Module supplies operating power to the EOTec 2000 Modem. Relay contacts provide remote alarm indication of supply output status.

The basic modem configuration consists of a Power Supply Module, Electrical Interface Module, and an Optical Interface Module. However, additional Power Supply modules may be added to address Redundant Power Supply applications. A maximum combination of five optical or electrical modules may be powered from one supply, inter-module communications and operating power is achieved through the integrated module interconnections.
