

## INSTALLATION INSTRUCTIONS

1. Determine degree of hold open or dead stop required. Then select proper dimensions from chart on OH80025B. Add 5/8" to "A" dimension for dead stop.
NOTE: A, B and C dimensions are measured from hinge center, not edge of door.
2. Locate " $B$ " dimension on frame and mortise $1 / 4$ " deep for jamb bracket as shown.

3. Locate "A" and "F dimensions on centerline of door and mortise $3 / 4$ " deep for channel. $1 / 16$ " head clearance shown. Coordinate the arm and rail cutout dimensions if head clearance varies.

4. Locate "C" and "E" dimensions on top of door and mortise $1 / 4$ " deep as shown for arm cutout.
5. Install door stop or holder with screws provided.

NOTES:

- All hollow metal frames are to be provided with $3 / 16^{\prime \prime}$ min. thickness x 12 " min. length reinforcement plates.
- All hollow metal doors are to have minimum $3 / 16^{\prime \prime}$ reinforcement plates.
- If dead stop is required add $5 / 8$ " to " A " dimension as noted on OH80025B.
- A, B and C dimensions are measured from centerline of pivot, not edge of door.
- Left hand shown, right hand opposite.
- All dimensions are given in inches. Metric = decimal (numerator divided by denominator) $\times 25.4$

## CAUTION:

Note location of swing clear hinge centerline to determine " A ", " B " and " $C$ " dimensions.

No. 6 Series Concealed Door Stops Less Spring

1. See OH80025A for installation instructions.
2. Select proper dimensions noted below.
3. Add $5 / 8$ " to "A" dimension for dead stop.
4. All dimensions given in inches.

Metric $=$ decimal (numerator divided by denominator) $\times 25.4$.
