RUTHERFORD CONTROLS
A DORMA Group Company

In or Out... we make it Easy!®

INSTRUCTIONS

1. To determine if the Strike Shim positions need adjustment, measure dimension "R" (see Figure 1) from the center to the edge of the latch. When necessary rearrange Strike Shims according to the chart below. The "shipped as default" positions are illustrated in Figure 2.

SHIM PLACEMENT CHART

Note: Shims consist of two thin and one thick. Install with the indicated hardware per the appropriate measurement R range.

Measurement "R"	"S1" Shims	"S1" Screws	"S2" Shims	"S2" Screws	
5/16" (8.2mm) or Less	None	M4 x 10mm	1 thick, 2 thin	M4 x 10mm	
5/16" - 3/8", (8.2 - 9.7mm)	1 thin	M4 x 10mm	1 thick, 1 thin	M4 x 10mm	Shipped as Default
3/8" - 7/16", (9.7 - 10.7mm)	1 thick	M4 x 10mm	2 thin	M4 x 10mm	
7/16" - 1/2", (10.7 - 12.2mm)	1 thick, 1 thin	M4 x 14mm	1 thin	M4 x 10mm	
1/2" - 9/16" (12.2 - 13.7mm)	1 thick, 2 thin	M4 x 14mm	none	none

Figure #2

When installing an electric strike on an inactive door of a set of double doors, it can be treated the same as a frame installation in most situations. For more information contact the Technical Service Department at 1-800-265-6630 or 519-621-7651.

In or Out... we make it Easy!®

INSTRUCTIONS Cont'd.

2. Determine the horizontal centerline.
   FOR MORTISE LOCKS: Position the strike against the edge of the door with the deadlock trigger fully on the strike's angled ramp and the latch within the strike cavity. Move door close to the frame. The horizontal centerline is clearly molded into the strike's pry-guard. Transfer onto door frame.
   FOR CYLINDRICAL LOCKS: Simply align the center of the latch with the center of the strike cavity. Move door close to the frame. The horizontal centerline is clearly molded into the strike's pry-guard. Transfer onto door frame.

3. Determine the vertical centerline of the door lock face, carefully considering any stops or gasket and transfer onto the door frame.

4. Use the vertical and horizontal centerlines marked on the drawing below to prepare the door frame for cutting.

5. If required, install the optional "no weld" mounting brackets as per the instructions included with the mounting brackets in the hardware pack.

6. Connect the incoming wiring from the power supply to the terminal screws on the strike insert. RCI door strikes are not polarity sensitive although be certain to observe proper polarity if a suppression diode is required for access control applications. To meet BHMA A156.31 install the MOV provided across the red & black power wires.

7. Install the door strike in the door frame using the screws provided.

MOUNTING TAB KIT INSTRUCTIONS

Mounting tab kit is for use with aluminum and steel frames that do not have factory installed mounting tabs for electric strike installation.

1. Prepare the frame as shown in the installation instructions (shipped separately with corresponding products). Fasten the mounting tabs to the faceplate of the strike, selecting the appropriate shims for your installation.

2. Using the assembled strike and tabs as a template, place against the frame and mark the mounting hole locations. Remove and drill a 3/16" hole in frame for each mounting tab and countersink the frame.

3. Remove the tabs from the faceplate and install in the frame using the 12-24 x 3/8" machine screws supplied. Tabs are zinc plated and drilled and tapped for this purpose.

4. Make final electrical connections as described in installation instructions (separate) and mount strike to the tabs with the 12-24 x 3/8" machine screws.

F1119

MEASUREMENT	FRACTIONAL INCHES	DECIMAL INCHES	METRIC mm
A	1 3/8"	1.38	34.9
B	9"	9.0	228.6
C	3-3/4"	3.75	95.3
D	1 1/2"	1.50	38.1
E	5/16"	0.31	7.8
F	5/32"	1.56	4.0
G	1-7/8"	1.88	47.6
X	Vertical Centre Line of Door Lock and Mounting Face Plate		
K	8-3/8"	8.38	213.0
M	12-24	N/A	N/A

NOTE: Specifications subject to change without notice.
* Dimension F is measured from face of mounting tab to face of frame.

Mounting Tab (2 incl.)

Self-Adhesive Mounting Shim (8 incl.)

12-24 Machine Screws (2 each to keep tab straight)
