SimpleK Master Key System and Key Management Software

Cylinders and Components

SimpleK

SimpleK is a flexible and intuitive software program that streamlines and simplifies the complexities of managing master key systems, keys, and facilities. It combines all tools needed by locksmiths, facility managers, security officers, and anyone else involved in the key management processes.

The software provides total key control with audit trails, outstanding keys, overdue keys, tools for the rekeying process, and more. SimpleK software allows you to import maps and floor plans to see who has access to each individual door, the associated keys, and hardware on the opening.

SimpleK allows you to manage keys and keying systems of all sizes and types. This includes: Medeco, Corbin Russwin, Yale, SARGENT, ASSA, ABLOY, Schlage®, Best®, and many others.

Features:

- Advanced tools for locksmithing and key control
- Manage all key systems (unlimited number of records)
- Robust import tools to bring current data into SimpleK
- Interactive floor plans
- Master key system design and expansion
- Key requests, approvals, issuances, and returns workflow
- Cylinders and core pinning (verifies key interchange)
- Door-Key association visualization and rekeying solution
- Easily identify keys, access, and hardware on openings
- Visibility to audit trails and outstanding/overdue keys

Small Format Brass Interchangeable Construction Core (72- Option)

- SARGENT 7200 Interchangeable 6 pin brass construction core (order 72-option with your SARGENT products) enables doors to be locked during the project construction period. Hardware prepared to accept 6 or 7 pin cores installed at job completion
- Using 7200 cores prevents keys for the permanent key system from becoming available during the construction process
- After construction is completed, the 7200 brass cores are removed and replaced with 7300 keyed-permanent interchangeable cores. Mortise and rim cylinders accept either 6 or 7 pin permanent cores. Key in lever locks ship with 6 pin tail installed and 7 pin tail piece shipped loose for use with 7 pin cores.
- Plug face is blue for easy identification
- A special Construction Control key 6254B CTL releases the locking sleeve of the construction core and allows for immediate removal of the core
- Construction cores are 6 pin and keyed alike construction master 6282B CMK
- Six (6) Construction Master keys and one (1) Control key are included per order unless otherwise specified
- Cores shipped with hardware
- Only available with standard cams
- For keyed temp core sold separately use catalog # 7200

432 RC Large Format Mortise Housing Installation Tool

- The 432 RC tool assists in installing SARGENT Large Format Interchangeable (Removable) Core mortise housings. This tool make it easy to thread a cylinder body into a Mortise lock and can also help check the cylinder function in a lock before installing the cylinder core.
- Order: 432 RC

432 IC Small Format Mortise Housing Installation Tool

- The 432 IC tool assists in installing SARGENT Small Format Interchangeable Core Mortise Housings. This tool make it easy to thread a cylinder body into a Mortise lock and can also help check the cylinder function in a lock before installing the cylinder core.
- Order: 432 IC

Cylinder Nut Wrench

- This wrench simplifies the installation and removal of mortise cylinders nuts used on 700 Series Auxiliary Control (80 Series ET Trim).
- Part number 97-0568

436-1 Top Loading Tool Kit

436-1 Kit is used for top loading of Large Format Interchangeable (Removable) Cores or Conventional Cylinders

Top loading feature for conventional cylinders and LFIC simplifies the repinning process. The dovetail cut at the top of the cylinder body allows the slide to be "peeled" off easily, without removing the barrel from the cylinder. These conventional cylinders can be easily identified with the "figure eight" marking on the back of the cylinder body (Shown).

This Kit includes the following components:

- Staking Block
- Staking Tool
- 100 Slides (6 Pin)

Additional slides available ordered separately:

Construction Master Keying Lost Ball, Split Key Construction Keying Kit (Lost Ball) Cylinders and Components

SARGENT
ASSA ABLOY

Lost Ball Construction Keying (21- Option)

Cylinders ordered in SARGENT keyways with construction keying will include the 21- option Lost Ball feature as standard. This replaces the 22- split key, only available as additions to existing 22- mastered keyed systems. The 21- is not available with old or new style removable/interchangeable core (5100 & 6300s). If construction keying is required for removable/interchangeable cores, use 52- or 64- construction keyed cores.

With the lost ball option, construction keying is obtained easily without going back to each cylinder and removing the construction split key when the building gets turned over.

With this feature, the 21- cylinder is master keyed with small ball bearings in one of the chambers. The plug is drilled in two places along both sides of the same chamber containing the balls. This allows

the construction master key to be used, while leaving these balls in the chamber above the plug when the key is rotated. When it is time to void the construction key, by simply using the change (day) key these balls will fall into the holes in the plug. The construction master key will now no longer operate the lock.

Field construction (21- lost ball) keying can also be easily accomplished with the # 439 LOST BALL REKEYING KIT. The kit includes a drilling block, knurled pin, 500 balls and drill with collar.

Orders with 21- will have all change keys shipped separately from hardware. New key systems provided with six construction master keys unless otherwise specified.

Additions to orders to existing systems are not provided with construction masters unless ordered separately.

Cutaway cylinder showing construction master key being used. The ball bearings lie flat with one positioned behind the other. They are not stacked.

Void Construction Key (with Change Key)

Note: Ball bearings shown are for illustration purposes only. They do not stack, they align next to each other and lay flat.

Change key inserted in cylinder

As change key rotates, construction balls fall into hole in the side of plug

Change key rotated to position for extraction

Construction key inserted after balls are trapped. Driver now extends into plug chamber. Construction key will not rotate

Split Key Construction Keying (22- Option)

The 22- option for split-key construction keying is available only for **existing systems**. When construction is completed, each cylinder must have the construction split key removed with extractor tool part number 14-0070 (one supplied per order). Orders with 22- option will have all change keys shipped separately from hardware. Not available with XC or Signature cylinders, non-SARGENT keyways or with cylinders used in other manufacturers' locks. Construction Master Keys part number 6250 CMK must be ordered separately.

439 Construction Keying Kit (Lost Ball)

This kit is designed to allow field construction master keying of SARGENT conventional, Signature and XC cylinders.

Each kit includes:

1. Drilling block
2. Drill bit
3. Knurled pin
4. Hex key (not shown)
5. Collar & Set screw Assy.
6. 500 each balls, P/N 13-1103 (not shown)

Bump Resistant Cylinders

Cylinders and Components

These cylinders employ specially engineered patented components designed to resist bumping while maintaining the cylinder's strength.

Bump resistant cylinders offer these features:

- Added line of defense against intruders
- Prevents unauthorized entry

The bump resistant feature is available for the following conventional cylinders (6 and 7 pin only):

- Mortise Cylinders: Conventional and XC (11-)
- Rim Cylinders: Conventional and XC (11-)
- Bored Cylinders: Conventional and XC (11-)

Specify bump resistance by adding BR Prefix.

Not available with 63- or 73- cylinder options.

How to order example: BR-10XG04 LL 26D

437BR Bump Resistant Re-Pinning Kit

The 437BR Kit is used to convert existing cylinders into bump resistant cylinders. Simply replace the drivers and springs in all chambers. Each kit includes 300 pins for use in mortise/rim cylinders, 300 pins for use in KIK/KIL cylinders and 600 springs.

BR is marked on the cylinder slide to identify Bump Resistant Cylinders

Keying Kits and Depth Key Sets

Cylinders and Components

437C Conventional Keying Kit

Includes the brass pins, springs and tools needed to rekey SARGENT conventional, XC cylinders (Except SFIC) and interchangeable cores master keyed. This heavy duty steel kit prevents pins from mixing. The kit includes 100 each of top springs 13-0265, 100 each 13-1769 springs used with standard drivers in the (10-) 6300 cores and 100 each of bottom and master/driver pins used in the following multi-family keyways: LA, RA, HA, CA, AA, BA, GA, KA, NA and VA.

Note: When re-pinning SARGENT 6300 Large Format Interchangeable (Removable) Core cylinders use hollow drivers and springs in chambers 3 and 4 found in the 437 RC supplemental pinning kit.

Tools included with 437C kit are:

- Tweezers
- Bitting Gauge 435
- Loading Thimble ("Plug Holder" LT2)
- Loading Rod for 6, 8, 10, 11, mortise & rim cylinders, 13-1034
- Loading Rod for 480, 470, 460 and 6300 Cores, 13-1035
- Loading Rod Blades 13-1138 and 13-1037
- See Table on Page 25 for pins included

When pins are sold separately, they are packaged in easy to see and use foil & plastic packages in quantities of 100 per size.

437C shown

437S Signature Keying Kit

Used to service SARGENT Signature cylinders. Includes all of the same components as the 437C plus:

- 100 Blocking Bar Springs, 13-0986
- 10 each Blocking Bars, 13-1109
- 1 each Field Service Tool, 13-3916

Note: When repining 10-6300 Signature Large Format Interchangeable (Removable) Core cylinders replace with special hollow drivers, the 437RC supplemental pinning kit is required

437 RC Large Format Interchangeable (Removable) Core Keying Kit

Use with the 437C or 437S kit. Includes additional pins to repin SARGENT 6300 and 10-6300 Large Format Interchangeable (Removable) Core cylinders.

The kit includes special hollow top driver pins and springs which are to be used in chambers 3 and 4. These pins are in the same increments as standard pins.

Each kit includes:

- 100 each hollow top pin springs, 13-0487
- 50 each cylinder retainers, 01-0660
- 50 each (hollow top pins). See Table on Page 25

Depth Key Sets

Used for manual code key cutting. Each set includes 10 each SARGENT unwarded 6 pin keys. Each different key is cut with all the same bittings from 0 through 9. Order as "Depthkeys".

Cylinder Spray Lubricant

3.0 oz aerosol pin number 18-0070

Cylinder Spray Cleaner/Deicer 3.0 OZ aerosol pin number 18-0435

It is recommended to lubricate cylinders at least twice a year for high volume or exterior applications.

Key Sections/Keyways

Cylinders and Components

Multiplex Keyways (L keyway family shown, others similar)

Multiplex keyways can be used together to expand a keying system. Master sections can be used on more than one cylinder with different plug sections, whereas key blank sections can only be used with cylinders of the same section. For example, a key cut on the LD key blank will operate cylinders with LA, LB or LC plug sections. A key cut on LA key blank will only operate cylinders with LA plug section.

Single Section Keyways

Single section keyways are independent, stand alone keyways and can not be tied to any other keyway to expand a keying system. Keys cut on R keyway keyblanks will only operate cylinders with R plug section.

*Cylinders in R and U keyways are only available 1-bitted for field keying

Restricted Keyways

Restricted keyways are SARGENT (factory) controlled geographically to limit sales and prevent unauthorized key duplication.

For availability of restricted keyways and key sections, contact SARGENT Key Records Department.

Orders for restricted keyway systems, key blanks and cylinders, require a letter of authorization from the system owner.

Note: Key section drawings are for illustration only. Not actual or to scale.

Key Blanks

Cylinders and Components

Key Blanks

Key blanks are sold in multiples of 50 and are ordered by specifying the catalog part number x key section. All key blanks are provided on the standard bow with the exception of the "C" keyway family. All key blanks include the SARGENT logo and are stamped with the respective key way or keysection.

Bitting Lists

Paper bitting lists provided at no charge for factory corresponding keyed orders when requested at time of hardware order. An owners letter of authorization must be attached to all purchase orders. Existing key system bittings lists also available contact key records for more information.

Visual Key Control and Tamper Proof Packaging

Cylinders and Components

Visual Key Control (Stamping)

To allow for easier key and cylinder identification, SARGENT offers the option for permanent stamping of keys and/or cylinder with industry standard alpha-numeric keyset symbols.

Non-visual key control stamped change (day) keys include bitting numbers as standard, (Item A) unless specified in keying order lead sheet submitted with order requesting to be omitted and key set substituted.

Degree, SFIC and Signature change keys are stamped with key set symbols as standard.

Master level keys do not include bitting numbers. Master level keys include system register numbers stamped on the first line, and the standard visual key control designations on the second line (Item B).

Up to 7 characters available for permanent stamping for Visual Key Control

- Key and cylinder identified by industry standard alpha-numeric keyset symbols
- Easy visual identification on the face of the plug (Item C or Item G or H) not available with XC, Signature or SFIC cylinders
- Concealed stamping on mortise and rim cylinders and bored lock cylinders available on the slide only (Item D or I)
- Cylinder-slide stamping available on 5100 and 6300 SARGENT Large Format Interchangeable (Removable) Cores, bored lock, mortise/rim cylinders (Item D, E & I)
- Core side engraving available for 7300B Series up to 7 characters (Item F)
- Special key stampings available, such as "DO NOT DUPLICATE" or "CITY OF PHOENIX"
- Degree, XC, and Signature cylinders not available with visual plug stamping
- Degree, XC, and Signature cylinders available with only concealed slide stamping (Item D, E and I) only
- Degree, XC, and Signature Large Format Interchangeable (Removable) Cores 10-6300 available with cylinder slide stamping (Item E, I D)

Note: SARGENT will stamp alternate identity codes on cylinders and/or keys whenever requested. This alternate stamping can not be different if both are to be stamped. Master Level Keys can also be stamped with a single alternate code. Alternate stamping must be consistent for key set on entire order for key and/or cylinder.

Tamper Proof Packaging

For the highest level of security for the end user, Tamper Proof Packaging is used on all Master Keys, Signature key blanks and all restricted key blanks. This heat sealed shrink wrap identified with "SARGENT Sealed For Your Security" provides assurance of the integrity of the factory generated key system.

Master Keying and Cylinder Terms

Cylinders and Components

SARGENT requires all orders containing Master Keying details to be submitted using the industry standard D.H.I. ANSI/BHMA format. Key Symbols used on a master keyed order require combinations of letters and/or letters and numbers.

For complete details on proper structuring format of key symbols refer to:

D.H.I. Handbook Section 8 Finish Hardware KEYING SYSTEMS AND NOMENCLATURE or, ANSI/BHMA Standard A156.28, AMERICAN NATIONAL STANDARDS FOR KEYING SYSTEMS.

Or contact SARGENT for assistance.

Basic Keying Terms

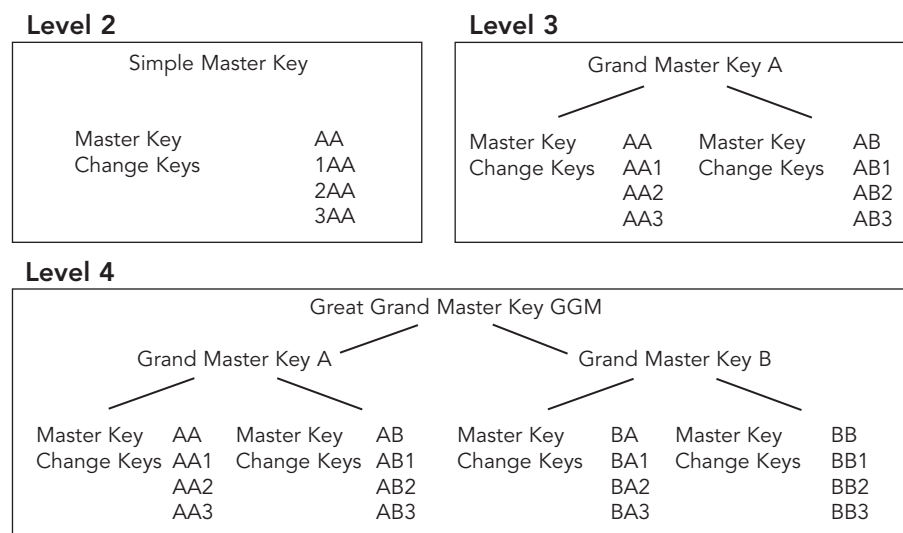

Keys and terms	Abbreviation	Definition
Change key	CK	Individual lock key
Masterkey	MK	Operates any given quantity of cylinders with different key changes
Grand Masterkey	GMK	Operates all individual locks already operated by masterkey(s)
Great Grand Masterkey	GGMK	Operates all locks under the various masterkey(s) and grand master key(s) already established
Emergency Key	EMK	Operates hotel locks having shut out feature which blocks entry by all other keys
Construction key	CMK	Operates all cylinders designated for a temporary period during construction
Control Key	CTL	Key to install or remove interchangeable or removable cores
Keyway	KWY	Broaching in a cylinder plug
Key section	KWY	Sidewarding on key to match broaching in plug
Single keyed	SKD	Cylinders operated by their change key only; not operated by any master key

Cylinder Terms
