**SUPERIOR EDGE
PROTECTION**

**BUILT FOR
PERFORMANCE**

PRODUCT OVERVIEW

10X is a high-performance, two-component, 100% solids, rapid-curing polyurea designed for repairing and filling control joints, construction joints, cracks, and spills in concrete floors. Engineered for exceptional durability, this semi-rigid formula provides superior edge protection, high shore hardness, and long-lasting support under heavy traffic and industrial loads. Its ultra-fast cure time allows for rapid shaving, finishing, and return to service—making it ideal for facilities requiring minimal downtime. This product cures effectively even in low temperatures, delivering reliable performance and a dependable solution across a wide range of project conditions.

KEY FEATURES

- ✓ **RAPID CURE TIME**
Quick return to service and minimal downtime
- ✓ **QUICK RETURN-TO-SERVICE**
Allows for fast shaving, finishing, and reopening
- ✓ **HIGH FLEXIBILITY**
Accommodates joint movement and heavy traffic
- ✓ **EXCELLENT ADHESION**
Bonds tenaciously to concrete for long-term performance
- ✓ **LOAD-BEARING**
Withstands heavy industrial and vehicular loads
- ✓ **COLD CLIMATE CURE**
Cures effectively in low temperatures
- ✓ **LOW VISCOSITY**
Self-leveling for deep joint penetration and easy application
- ✓ **HARDNESS BALANCE**
Semi-rigid formula resists wear while maintaining integrity
- ✓ **CHEMICAL RESISTANT**
Resists oils, fuels, salts, and common industrial chemicals
- ✓ **HYGIENIC & SANITARY**
Seamless, non-porous, and easy to clean
