Thick, durable protective layer

### CRYSTAL-CLEAR FINISH

Enhances beauty of any floor

**100% SOLIDS**  
PREMIUM POLYASPARTIC TECHNOLOGY

**SLOW GO. PERFECT RESULTS.**  
IDEAL FOR DETAIL WORK & LARGER SPACES.

## PRODUCT OVERVIEW

Aspartic 100 is a premium, two-component, 100% solids polyaspartic coating engineered for applications that require exceptional durability along with extended working time. Designed to give installers greater control and flexibility, Aspartic 100 provides a slower cure profile without compromising strength, clarity, or performance.

This high-build polyaspartic system offers outstanding UV stability, abrasion resistance, chemical resistance, and long-term gloss retention, making it ideal for demanding environments. Aspartic 100 delivers a low-odor, eco-compliant solution that forms a thick, durable, protective film in a single application. The coating produces a crystal-clear finish that resists yellowing, staining, and daily wear, ensuring long-lasting aesthetics and performance. Can be field pigmented using E-Poly universal colorants.

## KEY FEATURES

### LOW VOC FORMULATION

Eco-friendly and compliant for more environments

### NO ODOR

Low-odor for better comfort during installation

### HIGH-BUILD THICKNESS

Builds a thicker, more protective film in one coat

### UV STABILITY

Resists yellowing and fading for long-term clarity

### SUPERIOR CHEMICAL RESISTANCE

Resists oils, fuels, acids, and common chemicals

### EXCELLENT ABRASION RESISTANCE

Withstands heavy foot and vehicle traffic

### ENHANCED DURABILITY

Built to handle tough, high-traffic environments

### AMPLE WORKING TIME

Extended pot life for better control and precision

### QUICK RETURN-TO-SERVICE

Faster cure helps minimize downtime

### HIGH GLOSS RETENTION

Long-lasting shine that keeps floors looking new

## IDEAL FOR

GARAGES & SHOWROOMS

RESTAURANTS & HOSPITALITY

RETAIL & COMMERCIAL SPACES

INDUSTRIAL & WAREHOUSES

HEALTHCARE & EDUCATION FACILITIES
