FORMULATION**

PREMIUM POLYASPARTIC COATING. BUILT FOR PERFORMANCE.

PRODUCT OVERVIEW

Aspartic 85 Slow Go is a premium two-component, 85% solids, solvent-based aliphatic polyaspartic coating engineered for superior performance and extended working time. Designed for installers who need more open time—whether due to warmer climates, large-scale projects, or detailed application work—Slow Go delivers exceptional control without sacrificing durability or finish quality. This advanced formulation provides outstanding UV stability, abrasion resistance, chemical resistance, and stain resistance, ensuring long-lasting protection in both residential and commercial environments. Its excellent gloss retention preserves the floor's appearance over time, while its slow-cure characteristics allow for smoother, more consistent application and improved leveling. Also available in a low-odor option and can be field pigmented using E-Poly universal colorants.

IDEAL FOR:

**RESIDENTIAL
FLOORS**

**COMMERCIAL
SPACES**

**INDUSTRIAL
FACILITIES**

**HUMID CLIMATES &
DAMP CONCRETE**

KEY FEATURES

EXTENDED WORKING TIME

More open time for large areas and detailed application

ENHANCED FLOW & LEVELING

Smooth, self-leveling finish with exceptional clarity

WARM-TEMP WORKABILITY

Ideal for hot conditions and larger installation windows

IMPROVED AESTHETIC CONTROL

Better control for flake broadcast and custom designs

MINIMAL INSTALLATION STRESS

Lower pressure application for better results

UV STABILITY

Resists yellowing and fading for long-term clarity

HIGH ABRASION RESISTANCE

Withstands heavy foot and vehicle traffic

EXCELLENT CHEMICAL RESISTANCE

Resists oils, fuels, acids, and common chemicals

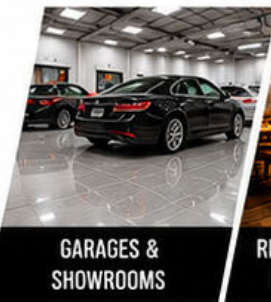

HIGH IMPACT STRENGTH

Durable protection that stands up to tough environments

LOW ODOR - LOW VOC OPTION

Installer and occupant friendly for more environments

**GARAGES &
SHOWROOMS**

**RESTAURANTS &
HOSPITALITY**

**RETAIL &
COMMERCIAL SPACES**

**INDUSTRIAL &
WAREHOUSES**

**HEALTHCARE &
EDUCATION FACILITIES**

LASTING BEAUTY. UNMATCHED DURABILITY.
