

FGP CS QUARTZ SYSTEM

COLOR STABLE HIGH-WEAR SYSTEM FOR SLIP-CRITICAL ENVIRONMENTS

NOMINAL THICKNESS
125 Mils (1/8")

FINISH
Textured Gloss

SYSTEM DESCRIPTION

FGP CS Quartz Broadcast System is a high-performance seamless flooring system engineered for superior slip resistance, durability, and chemical protection in wet, high-traffic, and aggressive service environments. Broadcast quartz aggregate creates a textured, high-traction surface with enhanced abrasion resistance and long-term wear performance. UV-stable polyaspartic resin technology provides excellent color stability to preserve long-term appearance and resist discoloration in light-exposed environments.

KEY FEATURES

- UV stability preserves long term appearance in UV exposed environments
- Durable, high traction surface with improved mechanical interlock
- Excellent abrasion resistance for high use and high wear environments
- Seamless and monolithic finish reduces joints and microbial harborage points
- Dense textured surface profile supports long-term wear resistance
- Suitable for frequent cleaning, washdown, and hygiene protocols
- Improved safety performance for slip sensitive environments.

IDEAL FOR

Pool Decks

Showers & Locker Rooms

Water Parks

Hospitality & Resort Areas

Food & Beverage Facilities

Laboratories

Healthcare Facilities

Fitness & Wellness Centers
