

# FGP SOLID INDUSTRIAL SYSTEM MD

MEDIUM-DUTY SOLID EPOXY SYSTEM FOR LIGHT SERVICE CONDITIONS

**NOMINAL THICKNESS**  
30-50 MILS

**FINISH**  
Smooth High-Gloss

## SYSTEM DESCRIPTION

FGP Industrial System is a high-solids epoxy flooring system designed for light-duty industrial and commercial environments requiring a seamless, chemically resistant surface. The system provides reliable abrasion resistance, durability, and strong adhesion to properly prepared concrete. Its dense, non-porous finish resists staining, chemical exposure, and routine wear while supporting easy cleaning and low-maintenance performance in light active service areas.

## IDEAL FOR

Aircraft Hangars

Light Industrial Facilities

Maintenance Shops

Storage Areas

Retail & Showroom Areas

Food & Beverage Preparation Areas

Pharmaceutical Facilities

Electronics Assembly Areas

## KEY FEATURES

- High compressive strength for sustained service loading
- Good abrasion resistance for light-traffic operational areas
- Increased light reflectivity which enhances visibility and workspace efficiency
- Seamless and monolithic finish reduces joints and microbial harborage points
- Low maintenance, floor coating supports simplified cleaning protocols
- Cost effective lifecycle performance in less demanding environments
- Protects underlying substrate
