

# FGP RAPID CURE FLAKE SYSTEM

FAST RETURN FLAKE SYSTEM  
FOR TIME SENSITIVE INSTALLATIONS

NOMINAL THICKNESS  
32-50 Mills

FINISH  
Textured Gloss

## SYSTEM DESCRIPTION

FGP Rapid-Cure Flake System is a fast-install epoxy flake system designed for reduced downtime in time-sensitive or occupied facilities. It provides strong compressive strength, chemical resistance, and a durable decorative finish under accelerated installation schedules. It supports rapid return to service while maintaining system integrity and can be installed on damp concrete with moisture vapor emission rates up to 9 lbs under moderate conditions, reducing the need for separate moisture mitigation.

## KEY FEATURES

- ✓ Fast-curing system designed to reduce installation downtime
- ✓ Early return to service for occupied or time-sensitive facilities
- ✓ High-strength epoxy matrix with strong compressive performance
- ✓ Durable long-term wear surface with high abrasion resistance
- ✓ Chemical and stain resistant for easier cleaning and protection
- ✓ Impervious finish resists moisture intrusion and contamination
- ✓ Controlled installation for predictable and reliable project sequencing

## IDEAL FOR

Residential  
Garages

Occupied  
Facilities

Retail  
Environments

Maintenance  
Areas

Healthcare  
Facilities

Educational  
Facilities

Fitness  
Centers

Public Safety  
Buildings
