

PREVENTIVE MAINTENANCE CHECKLIST

OVERVIEW

A structured preventive maintenance program minimizes wear and prolongs coating life.

Checklist

- Daily sweeping/mopping and spot cleaning.
- Weekly visual inspection of high-traffic zones.
- Monthly deep cleaning using approved products.
- Immediate response to chemical or oil spills.
- Periodic measurement of slip resistance.
- Document all maintenance activities.
- Repair minor damage promptly using compatible materials.
- Review environmental conditions (temperature, humidity) that could affect coating.
- Schedule annual inspection for surface integrity and coating performance.
