

TRANSPORT & JOBSITE STORAGE

OVERVIEW

Proper transport and on-site storage prevent damage during handling and installation preparation.

Guidelines

- Transport containers upright and secured to prevent tipping or leakage.
- Avoid excessive vibration or impact during transport.
- On-site, store in shaded, dry, and stable-temperature areas.
- Protect from rain, snow, and excessive dust.

Best Practices

- Inspect containers upon arrival.
- Keep products off the floor on pallets to avoid water damage.
- Limit exposure time on site before use to maintain optimal performance.
