

# WATER-BASED URETHANE

## OVERVIEW

---

Water-based urethanes provide low-VOC, clear or pigmented topcoats suitable for interior surfaces. They offer UV stability, abrasion resistance, and color enhancement while being environmentally friendly.

### **Key Features**

- Low odor and VOC compliance.
- Good chemical and abrasion resistance.
- Enhances gloss and color depth of underlying coatings.

### **Application Guidelines**

- Apply over fully cured resinous basecoat or primer.
- Use roller or spray; maintain recommended wet film thickness.
- Avoid high humidity or cold surfaces to prevent blush or haze.

### **Best Practices**

- Pre-test for compatibility with underlying coatings.
- Allow full cure before heavy traffic.
- Clean tools with water immediately after use.
