# 4. First Aid Measures

# Eyes:

With eyelids open, immediately flush eyes with lots of lukewarm water for at least 30 minutes. Get immediate medical assistance.

#### Skin

Wash the skin thoroughly with plenty of water for at least 15 minutes, using a mild and non-abrasive soap. Cold water may be used.

## Ingestion:

Never give anything by mouth if the victim is semi-conscious, unconscious, or convulsing.

#### Inhalation:

Evacuate to fresh air and administer artificial respiration if breathing stopped. Obtain medical aid.

# 5. Fire Fighting Measures

## Flammable Properties:

Flash Point (Degree F) ..... 24F Flash Point Method ..... TCC

Explosive Limits:

Upper explosive limit: 11.5 Lower explosive limit: 1.0

## Hazardous Combustion Products:

Carbon, Hydrogen Sulfide, Sulfur oxide, or their compounds

# Extinguishing Media:

CO2, foam, dry chemical or halon

#### Firefighting Procedures:

Fire-Fighters should wear self-contained breathing apparatus and full protective equipment.

Extinguish all nearby sources of ignition.

# 6. Accidental Release Measures

# Small Spill:

Eliminate all sources of ignition, provide ventilation, contain spill, and absorb with inert absorbent.

Wear appropriate breathing apparatus (if applicable) and protective clothing.

Use only non-sparking tools and equipment.

# Large Spill:

Remove by mechanical means and place in containers.

Use only non-sparking tools and equipment.

#### Environmental Precautions:

Prevent the product or the wash waters from entering the water system or sewers.

US regulations require reporting spills of this material that could reach any surface waters. In Canada, report to the applicable provincial environment ministry.

### 7. Handling and Storage

#### Handling:

Avoid breathing dust/fume/gas/mist/vapours/spray.

Do not get in eyes, on skin, or on clothing.

Wash contaminated clothing thoroughly after handling.

Wash skin thoroughly (with soap and water) after handling.

### Storage:

Store in a cool, dry well ventilated place, away from incompatible materials.

Store in a closed/sealed container.

Keep away from heat, sparks, flame, and ignition source.

# 8. Exposure Controls/Personal Protection

### Airborne Exposure Limits:

Mixture, see section 3

### Engineering Controls:

General mechanical ventilation or local exhaust should be suitable to keep vapour concentrations below the threshold limit values.

Use explosion-proof electrical/ventilating/lighting equipment

Avoid breathing dust/fumes/gas/mist/vapours/spray

Effective exhaust ventilation should always be provided to draw fumes, vapors or dust away from workers to prevent routine inhalation.

## Personal Protective Equipment:

#### Respiratory Protection:

In case of inadequate ventilation, wear respiratory protection.

Use NIOSH/MSHA approved Cartridge Respirator or Mask to keep airborne mists and concentrations below the time weighted threshold limit values.

#### Skin Protection:

Wear protective gloves (eg Neoprene or Nitrile) for skin protection.

### Eye Protection:

Wear eye protection/face protection. Contact lenses should not be worn without goggles.
