

# SAFETY DATA SHEET

Activator 99322

### **Section 1. Identification**

GHS product identifier SDS code

: Activator 99322 : A42880

#### Relevant identified uses of the substance or mixture and uses advised against

|  | Identified uses  |
|--|--|
| Industrial use   |  |
|  | Uses advised against   |
| Consumer use   |  |
| Manufacturer   | : Akzo Nobel Coatings, Inc.<br>1 East Water Street<br>Waukegan, IL 60085<br>USA<br>Tel. 1 847 623 4200<br>Email: customer.service@akzonobel.com  |
|  | Akzo Nobel Coatings Ltd.<br>110 Woodbine Downs Blvd.<br>Unit #4 Etobicoke, Ontario<br>Canada M9W 5S6<br>+1 (800) 618-1010  |
| Importer   | <ul> <li>Cía. Mexicana de Pinturas International<br/>S.A. de C.V., Carretera Anillo Periférico,<br/>No Ext 205, No Interior A, Colonia HDA S JOSE, Garcia, Garcia, CP 66000, Nuevo<br/>Leon.</li> <li>RFC: ANA9510267C4</li> </ul> |
| Emergency telephone<br>number (with hours of<br>operation) | : CHEMTREC +1 (800) 424-9300 (Inside the US)<br>CHEMTREC International +1 (703) 527-3887 (Outside the US, collect calls accepted)  |
| Section 2. Hazar   | ds identification  |
| OSHA/HCS status  | : This material is considered hazardous by the OSHA Hazard Communication Standard  |

#### Classification of the substance or mixture FLAMMABLE LIQUIDS - Category 2 ACUTE TOXICITY (oral) - Category 4 ACUTE TOXICITY (dermal) - Category 4 ACUTE TOXICITY (inhalation) - Category 4 EYE IRRITATION - Category 2A CARCINOGENICITY - Category 2A CARCINOGENICITY - Category 2 TOXIC TO REPRODUCTION (Fertility) - Category 1B TOXIC TO REPRODUCTION (Unborn child) - Category 1B SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3

| Date of issue/Date of revision | : 12/21/2022 | Version : 1.03 |           |
|--------------------------------|--------------|----------------|-----------|
| Date of previous issue         | : 12/21/2022 | 1/15           | AkzoNobel |

### Section 2. Hazards identification

| GHS label elements                  |   |
|-------------------------------------|---|
| Hazard pictograms                   |   |
| Signal word                         | : Danger  |
| Hazard statements                   | <ul> <li>Highly flammable liquid and vapor.<br/>Harmful if swallowed, in contact with skin or if inhaled.<br/>Causes serious eye irritation.<br/>May damage fertility or the unborn child.<br/>Suspected of causing cancer.<br/>May cause respiratory irritation.</li> </ul>  |
| Precautionary statement             | <u>s</u>  |
| Prevention                          | : Obtain special instructions before use. Do not handle until all safety precautions have<br>been read and understood. Wear protective gloves. Wear protective clothing. Wear<br>eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and<br>other ignition sources. No smoking. Use only outdoors or in a well-ventilated area.<br>Avoid breathing vapor. Do not eat, drink or smoke when using this product. Wash<br>hands thoroughly after handling.   |
| Response                            | : IF exposed or concerned: Get medical attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. IF SWALLOWED: Call a POISON CENTER or physician if you feel unwell. Rinse mouth. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. IF ON SKIN: Wash with plenty of soap and water. Call a POISON CENTER or physician if you feel unwell. Take off contaminated clothing and wash it before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. |
| Storage                             | : Store locked up.  |
| Disposal                            | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Hazards not otherwise<br>classified | : None known.   |

### **Section 3. Composition/information on ingredients**

Substance/mixture

: Mixture

| Ingredient name          | %         | CAS number |
|--------------------------|-----------|------------|
| 4-methylpentan-2-one     | ≥25 - ≤46 | 108-10-1   |
| pentane-2,4-dione        | ≥25 - ≤30 | 123-54-6   |
| ethyl 3-ethoxypropionate | ≥25 - ≤50 | 763-69-9   |
| dibutyltin dilaurate     | ≤0.3      | 77-58-7    |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10<br/>minutes. Get medical attention.</li> </ul>  |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.  |
| Skin contact | : Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. If necessary, call a poison center or physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion    | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

#### Most important symptoms/effects, acute and delayed

#### Potential acute health effects : Causes serious eye irritation. Eye contact Inhalation : Harmful if inhaled. May cause respiratory irritation. Skin contact : Harmful in contact with skin. : Harmful if swallowed. Ingestion **Over-exposure signs/symptoms** Eye contact : Adverse symptoms may include the following: pain or irritation watering redness Inhalation : Adverse symptoms may include the following: respiratory tract irritation coughing reduced fetal weight increase in fetal deaths skeletal malformations Skin contact : Adverse symptoms may include the following: reduced fetal weight increase in fetal deaths skeletal malformations : Adverse symptoms may include the following: Ingestion reduced fetal weight increase in fetal deaths skeletal malformations

#### Indication of immediate medical attention and special treatment needed, if necessary

| Date of issue/Date of revision | : 12/21/2022 | Version : 1.03 |           |
|--------------------------------|--------------|----------------|-----------|
| Date of previous issue         | : 12/21/2022 | 3/15           | AkzoNobel |

### Section 4. First aid measures

| Notes to physician         | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
|----------------------------|---|
| Specific treatments        | : No specific treatment.  |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                            |  |
|--|--|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing<br>media              | : Do not use water jet.  |
| Specific hazards arising from the chemical     | : Highly flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with the<br>risk of a subsequent explosion.   |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide   |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

### Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
|--------------------------------|-----|---|
| For emergency responders       | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for co   | ont | ainment and cleaning up   |
| Small spill                    | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste   |

| Date of issue/Date of revision | : 12/21/2022 | Version : 1.03 |           |
|--------------------------------|--------------|----------------|-----------|
| Date of previous issue         | : 12/21/2022 | 4/15           | AkzoNobel |

disposal container. Dispose of via a licensed waste disposal contractor.

### Section 6. Accidental release measures

| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a |
|-------------|--|
|             | licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact   |
|             | information and Section 13 for waste disposal.   |

### Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures  | ut on appropriate personal protective equipment (see Section 8). Avoid expostain special instructions before use. Avoid exposure during pregnancy. Deandle until all safety precautions have been read and understood. Do not go on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use on dequate ventilation. Wear appropriate respirator when ventilation is inadequate tests and confined spaces unless adequately ventilated. Highnal container or an approved alternative made from a compatible materia ghtly closed when not in use. Store and use away from heat, sparks, open by other ignition source. Use explosion-proof electrical (ventilating, lighting aterial handling) equipment. Use only non-sparking tools. Take precautior easures against electrostatic discharges. Empty containers retain product and can be hazardous. Do not reuse container. | o not<br>et in eyes<br>ly with<br>uate. Do<br>Keep in the<br>al, kept<br>flame or<br>and<br>nary |
|--|---|--|
| Advice on general occupational hygiene                             | ating, drinking and smoking should be prohibited in areas where this materi<br>andled, stored and processed. Workers should wash hands and face befor<br>inking and smoking. Remove contaminated clothing and protective equipn<br>atering eating areas. See also Section 8 for additional information on hygie<br>easures.   | re eating,<br>nent before  |
| Conditions for safe storage,<br>including any<br>incompatibilities | core in accordance with local regulations. Store in a segregated and appro-<br>core in original container protected from direct sunlight in a dry, cool and we<br>ea, away from incompatible materials (see Section 10) and food and drink.<br>cked up. Eliminate all ignition sources. Separate from oxidizing materials.<br>ontainer tightly closed and sealed until ready for use. Containers that have<br>beened must be carefully resealed and kept upright to prevent leakage. Do nabeled containers. Use appropriate containment to avoid environmental<br>ontamination. See Section 10 for incompatible materials before handling or  | ell-ventilated<br>Store<br>Keep<br>been<br>not store in  |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name               |              | Exposure limits   |           |  |
|-------------------------------|--------------|---|-----------|--|
| 4-methylpentan-2-one          |              | ACGIH TLV (United States, 3/20<br>Substances for which there is a | ,         |  |
|                               |              | Exposure Index or Indices   | 2.0.09.00 |  |
|                               |              | STEL: 75 ppm 15 minutes.  |           |  |

|                     |                   |   | Absorbed through skin.  |
|                     |                   |   | TWA: 25 ppm 8 hours.  |
|                     | -ethoxypropionate |   | None.   |
| dibutylt            | in dilaurate      |   | OSHA PEL 1989 (United States, 3/1989).  |
|                     |                   |   | Absorbed through skin. Notes: measured  |
|                     |                   |   | as Sn   |
|                     |                   |   | TWA: 0.1 mg/m³, (measured as Sn) 8 hours.   |
|                     |                   |   | Form: Organic   |
|                     |                   |   | ACGIH TLV (United States, 3/2019).  |
|                     |                   |   | Absorbed through skin. Notes: as Sn   |
|                     |                   |   | STEL: 0.2 mg/m <sup>3</sup> , (as Sn) 15 minutes.   |
|                     |                   |   | TWA: 0.1 mg/m <sup>3</sup> , (as Sn) 8 hours.   |
|                     |                   |   | NIOSH REL (United States, 10/2016).   |
|                     |                   |   | Absorbed through skin. Notes: as Sn   |
|                     |                   |   | TWA: 0.1 mg/m <sup>3</sup> , (as Sn) 10 hours.  |
|                     |                   |   | OSHA PEL (United States, 5/2018). Notes:<br>as Sn   |
|                     |                   |   |   |
|                     |                   |   | TWA: 0.1 mg/m³, (as Sn) 8 hours.  |
|                     |                   |   |   |
| Appropr<br>controls | iate engineering  | other engineering controls to<br>recommended or statutory lin | lation. Use process enclosures, local exhaust ventilation or<br>keep worker exposure to airborne contaminants below any<br>nits. The engineering controls also need to keep gas,<br>below any lower explosive limits. Use explosion-proof |

**Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### Section 8. Exposure controls/personal protection

| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected<br>based on the task being performed and the risks involved and should be approved by a<br>specialist before handling this product.  |
|------------------------|--|
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. |

### Section 9. Physical and chemical properties

### Section 11. Toxicological information

#### Sensitization

Not available.

#### **Mutagenicity**

Not available.

#### **Carcinogenicity**

Not available.

#### **Classification**

| Product/ingredient name | OSHA | IARC | NTP |
|-------------------------|------|------|-----|
| 4-methylpentan-2-one    | -    | 2B   | -   |

#### **Reproductive toxicity**

Not available.

#### **Teratogenicity**

Not available.

#### Specific target organ toxicity (single exposure)

| Name                 | Category   | Route of<br>exposure | Target organs                   |
|----------------------|------------|----------------------|---------------------------------|
| 4-methylpentan-2-one | Category 3 | Not applicable.      | Respiratory tract<br>irritation |
| dibutyltin dilaurate | Category 1 | Not determined       | thymus                          |

#### Specific target organ toxicity (repeated exposure)

| Name                 | ·····      | Route of<br>exposure | Target organs  |
|----------------------|------------|----------------------|----------------|
| dibutyltin dilaurate | Category 1 | Not determined       | Not determined |

#### Aspiration hazard

Not available.

| Information on the likely | : Not available. |
|---------------------------|------------------|
| routes of exposure        |                  |

#### Potential acute health effects

| Eye contact  | : Causes serious eye irritation.                        |  |
|--------------|---|--|
| Inhalation   | : Harmful if inhaled. May cause respiratory irritation. |  |
| Skin contact | : Harmful in contact with skin.                         |  |
| Ingestion    | : Harmful if swallowed.                                 |  |

#### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
|-------------|---|
| Inhalation  | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations |

### Section 11. Toxicological information

| Skin contact | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations |
|--------------|---|
| Ingestion    | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| <u>Short term exposure</u>     |              |       |
|--------------------------------|--------------|-------|
| Potential immediate<br>effects | : Not availa | able. |
| Potential delayed effects      | : Not availa | able. |
| <u>Long term exposure</u>      |              |       |
| Potential immediate<br>effects | : Not availa | able. |
| Potential delayed effects      | : Not availa | able. |
| Potential chronic health effe  | <u>ects</u>  |       |
| Not available.                 |              |       |

General: No known significant effects or critical hazards.Carcinogenicity: Suspected of causing cancer. Risk of cancer depends on duration and level of<br/>exposure.Mutagenicity: No known significant effects or critical hazards.Teratogenicity: May damage the unborn child.Developmental effects: No known significant effects or critical hazards.Fertility effects: May damage fertility.

#### Numerical measures of toxicity

#### Acute toxicity estimates

Taviaitu

| Route               | ATE value    |
|---------------------|--------------|
| Oral                | 1047.5 mg/kg |
| Dermal              | 1451.8 mg/kg |
| Inhalation (vapors) | 10.26 mg/l   |

### Section 12. Ecological information

| Product/ingredient name        | Result                             | Species  | Exposure |

| Soil/water partition | : Not available. |
|----------------------|------------------|
| coefficient (Koc)    |                  |

**Other adverse effects** : No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

The information provided in section 14 is based on a bulk package shipment via ground transport in North America. All shippers are responsible for ensuring the proper transportation classification and package/container requirements are followed for the relevant mode of transport.

### Section 16. Other information

#### Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

#### Procedure used to derive the classification

| Classification   | Justification         |
|--|-----------------------|
| FLAMMABLE LIQUIDS - Category 2   | On basis of test data |
| ACUTE TOXICITY (oral) - Category 4   | Calculation method    |
| ACUTE TOXICITY (dermal) - Category 4   | Calculation method    |
| ACUTE TOXICITY (inhalation) - Category 4   | Calculation method    |
| EYE IRRITATION - Category 2A   | Calculation method    |
| CARCINOGENICITY - Category 2   | Calculation method    |
| TOXIC TO REPRODUCTION (Fertility) - Category 1B  | Calculation method    |
| TOXIC TO REPRODUCTION (Unborn child) - Category 1B   | Calculation method    |
| SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3 | Calculation method    |
| History  |                       |
| Date of printing : 21 December 2022  |                       |

| Date of printing                   | : 21 December 2022 |
|------------------------------------|--------------------|
| Date of issue/ Date of<br>revision | : 21 December 2022 |
| Date of previous issue             | : 21 December 2022 |
| Version                            | : 1.03             |

### Section 16. Other information

| Key to abbreviations | : ATE = Acute Toxicity Estimate  |
|----------------------|--|
| -                    | BCF = Bioconcentration Factor  |
|                      | GHS = Globally Harmonized System of Classification and Labelling of Chemicals      |
|                      | IATA = International Air Transport Association                                     |
|                      | IBC = Intermediate Bulk Container  |
|                      | IMDG = International Maritime Dangerous Goods                                      |
|                      | LogPow = logarithm of the octanol/water partition coefficient                      |
