

ASPLUND | COLLECTION

FURNITURE GUIDE

PROUD MEMBERS OF

ASPLUND - MATERIALS

In the ASPLUND range the chosen colours and nuances in the materials and finishes are carefully chosen to enrich both materials as well as the product.

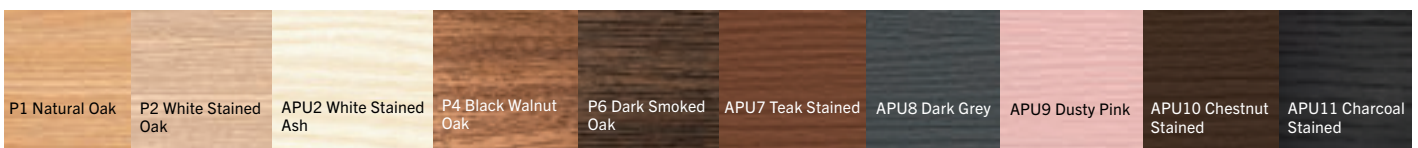

ASPLUNDS' chosen materials and finishes:

veneers in oak and ash

Our oak and ash veneers are FSC-certified and sourced within the EU.

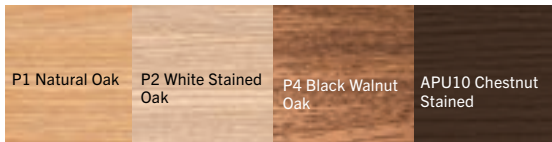

Every piece is unique in its own and is pressed on top of a MDF-Plus or a plywood which is then treated with a tinted oil wax. Oil wax without top coat must be maintained, read more about this in our maintenance/care guides.

Tabletops for dining tables are coated with a polyurethane layer. Desktops are as standard treated with an oil wax. The polyurethane makes the surfaces less delicate when used daily as it is more resistant to water, stains and UV-radiation.

SOLID WOOD

Our solid wood is FSC certified and sourced within the EU. Solid wood is a natural and living material. We love to use solid wood for its strength, quality, strong character, and unique grain and colour. Generally the solid wood is treated with a sustainable oil wax if nothing else mentioned.

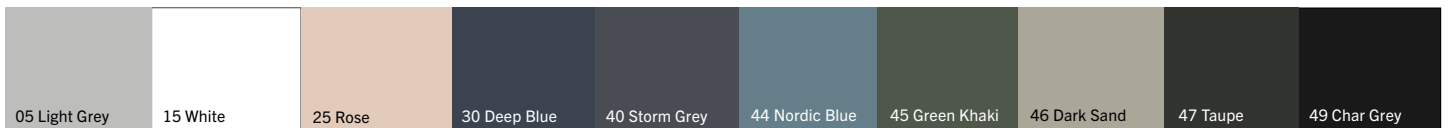

LACQUERED MDF

Our EU-sourced MDF is PEFC-certified and Svanenmärkt Medium Density Fibreboard. The density is approx. 760-800 kg/m³.

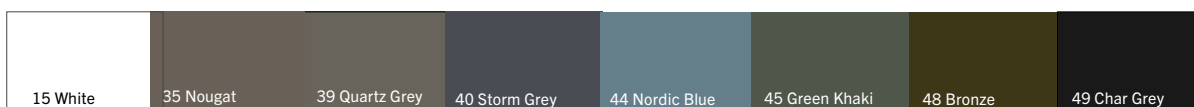

Our matte-lacquered MDF have a triple applied durable acid-hardened lacquer. For some products, where extra durability is required, we add a polyurethane lacquer.

Since Jan 2022, our Snow and Frame series are coated with a more sustainable water-based laquer. It contains a crosslink formula that makes it more dense, durable, has a higher viscosity and is more resistant to liquids as alcohol and coffee than other sustainable lacquers.

LACQUERED METAL

The metal is lacquered with a smooth semi-matte powdercoating in the ASPLUND colours.

GLASS: CLEAR, LACQUERED OR TINTED

Clear glass is a 8 mm hardened glass with a slight phase to protect its corners and edges.

The lacquered glass actually has a lacquered MDF board as a base with a clear glass on top. If there is the demand for a pure white glass, there is a special "opti white" glass that can be ordered.

Tinted mirror glass for Otto Mirror are also possible for special orders on Tati coffee tables in Bronze.

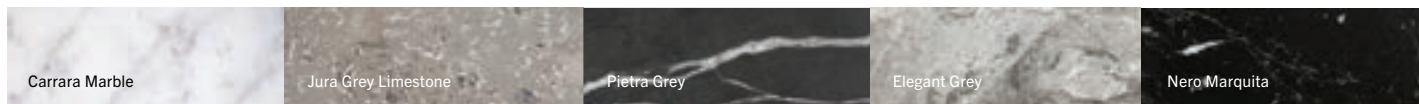

STONES

Carrara Marble, Nero Marquina Marble, Pietra Grey Marble, Elegant Grey marble and Jura Limestone.

Our stone tops are sourced within the EU. They are polished to result a smooth matte appearance and are coated with a NANO finish which makes it more resistant to grains and stains plus that it makes the surface softer and smoother.

NANO finishes wears off after use and shall be maintained. Either with an Alkemi NANO spray or a natural stone wax cleaning kit.

All stones are taken from nature and every stone is different. Small tarolis, fossils , colour differences and lines are a proof of authenticity.

Carrara Marble is the ultimate classic type of marble that is quarried in the Carrara region of Italy. It has been used for centuries in art and architecture, and is prized for its unique veining and fresh white color. We use a B-C assortment quality which have reference to the clarity of the white.

Jura Limestone is a beige and grey limestone with no red tones from Germany. It is renowned throughout the world for its enduring beauty with encapsulated "Ammonite" fossils dating back to the Jurassic period, hence the name "Jura". Fine lines and metallic shimmers can also be a part of the characteristic pattern.

Pietra Grey is a calcite marble, A warm gray base that is calm and solid in appearance . The pattern alternates between very fine snow-white streaks and barely perceptible linear slate-colored glazes. The surface is silk matt honed.

Although Elegant Grey is a light grey marble quarried in Pakistan. The light grey variations in the stone has an elegant scandinavian look. The natural, non directional pattern is elegant and soft shifting and the surface is silk matt honed.

Nero Marquina with origin from Spain, it is an elegant black marble with discrete white veins. The surface is silk matt honed.

COLOUR CORE LAMINATE

A full all-white Formica laminate with no dark edges. Relatively maintenance-free surface material that has a high resistance to liquids and deeper scratches.

15 White

LEATHER: NATURAL, COGNAC, DARK BROWN AND BLACK

The leather we use is a vegetable tanned leather. The natural material, an aniline leather is threatened with wax, which gives an authentic look and patina from its original structure including its original scars, marks and color changes.

For any requires outside our standard range, please do not hesitate to contact us. Many materials can be readapted on other elements of our furniture.

Please find our Maintenance Guide for the different materials and finishes on page 76.

ASPLUND - ABOUT OUR COLLECTION

For over three decades ASPLUND has worked on developing new designs by up-and-coming, as well as acclaimed, Swedish and international designers. This has resulted in a collection of carpets, storage, tables and other products. The ASPLUND Collection has a style that is something functional yet elegant, something Swedish yet international. And something we want to have and use in our own spaces. Pieces with a subtle identity in high quality which we believe will last for a long time.

Not only because of the well worked through design and function, but also since we choose to have a handmade or a semi manual production where everything is made to order. In that way we do not have any leftover stock and only produce as many pieces as actually needed. As a producer we see it as our responsibility to make sure that our production take place under both ethically and environmentally sustainable conditions. We are always working on improving not only our quality, but also to reach our sustainability goals. To find out more about our continuous work, check our website where we update our improvements as often as we can.

ASPLUND - MADE IN SWEDEN

In a time where the trend among furniture brands is to outsource production abroad, ASPLUND remains determined and committed to keep most of our manufacturing in Sweden. This way we are contributing to and invigorating the Swedish furniture industry and also maintaining original core values of Swedish design and manufacturing. Many pieces in our collection involves expertise from several small factories to get them up to standard. All factories specialized in their own field.

ASPLUND - THE STORY

Founded in 1990, by brothers Michael and Thomas Asplund, Gallery ASPLUND was exhibiting furniture as objects of fine art. In collaboration with designers and artists the gallery soon became a stage for contemporary art. These collaborations resulted in ASPLUND's own production line of furniture and contemporary design pieces; "ASPLUND Collection" led by Creative Director Sandra Adrian Asplund, who joined the company in 1995. The same year the gallery moved to larger premises at our current location, Sibyllegatan 31, where we today have the office, R&D dept, interior & design studio and a store that is also our showroom. With constant influences by literally meeting the end customer, and through our interior architect team's challenges, we learn daily what is needed in our homes and spaces. Nature, craftsmanship, materials and techniques combined with tradition have always been in focus and our key inspiration. This combined with the knowledge that natural materials both feels vivid and changes gracefully over time, has contributed to the ASPLUND approach of design. Over the years ASPLUND's signature style has shown the world that Swedish minimalism can be warm and elegant. We work to create design classics that can be passed on for generations.

Today ASPLUND is an internationally acclaimed design establishment, which has contributed significantly to the idea of contemporary Swedish design. ASPLUND Collection, created in collaboration with renowned designers, can be found in homes, hotels and public spaces globally. Today ASPLUND is represented at retailers world wide. The rest is both history, the present and hopefully the future.

/The ASPLUND Family

REMY SERVING TROLLEY

By Broberg & Ridderstråle 2021

CHAMFER

By Mattias Stenberg 2018

A coffee table and a stackable lounge table with versatile functionality. The name Chamfer comes from the angled detail that make the specific corner appearance.

Colour:
Extra White Stained Oak (EP2)

Please note our stained finishes are applied by hand and may vary.

Chamfer Lounge Table/Shelf

H: 35 cm
W: 40 cm
L: 180 cm

With adjustable feet.

This lounge unit is quite special and versatile since it easily can be stacked together into a nice and sturdy bookshelf to use as a room divider or against a wall. Also, putting two or three together make a really generous coffee table. In other word, use it as you like.

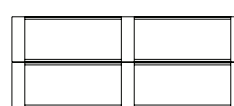

Practical info:

Comes with adjustable and removable feet about 0,5-10 mm.

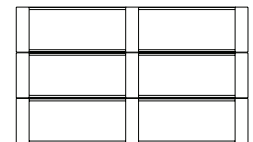

The stacked shelf is really steady without fittings up to 4 units. But for proper child/toddler protection it needs to be assembled with screws.

This is something we do not provide.

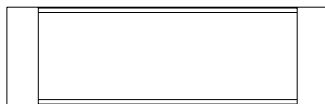

The product is sold as a floor unit.

Example of two stacked shelves.

Example of three stacked shelves.

Chamfer Coffee Table

H: 35 cm
W: 80 cm
L: 115 cm

With adjustable feet.

A low minimalistic table with optimized space for books and other accessories. One short side is covered to hide eventual mess and give a calm feeling, while the other sides are open. For a wider lounge, it looks really nice to put two units beside eachother.

Please note Chamfer Coffee table and Shelf are available on Quick Ship. From our warehouse in 1-2 weeks:

Extra White Stained Oak (EP2)

Please note that we have some products available within a shorter lead time. Please see our Quick Ship assortment in separate price list.

ASPLUND - FURNITURE CARE/MAINTENANCE

MAINTENANCE OF WOOD MATERIALS

Wood is a living material, making each part unique. Solid wood, veneer or lacquered MDF can be cleaned with a soft cloth, plain water and soap or mild detergent. Be aware and wipe up liquids on surfaces immediately. With more extensive stains on wood and veneer you can sand lightly with very fine sandpaper in the direction of the wood veins. Note that veneers can be as thin as 0.6 mm. Wood furniture treated with clear, matte or coloured polyurethane or acid-curable paint should not be sanded since the lacquered surface becomes easily scratched and destroyed. Waxed, dyed or oiled surfaces treated with colour pigmentation can also lose pigments and be affected if an area is sanded or taken care of incorrectly. If sanding surfaces is necessary, please do so carefully and on your own risk or contact a professional carpenter. Sun, moisture and everyday wear affect the natural protection of the material.

We recommend using Osmo maintenance wax regularly and a few times each year to treat and care for our wooden furniture. In case of an accident, we have a small bottle of water-based paint for our painted MDF and wood furniture in all standard colours that you easily can order from us at Asplund, directly online. Carefully read and follow the attached instructions for each treatment and cleaning agent.

MAINTENANCE OF LAMINATES

Clean laminated surfaces with water and mild detergents. When removing less severe stains, we recommend liquids or agents that does not contain abrasive substances. Stubborn stains and discoloured areas can most often be removed by gently using slightly stronger detergent cleaners. However, steel wool, scouring sponges or strong abrasive cleaners should never be used. Ink and tumbler marks from bullet and felt pens can be removed with a suitable solvent (eg alcohols, acetone, etc.) on a clean cloth. Organic solvents such as mineral turpentine and cellulose thinner can also be used to remove paint stains because they do not affect the laminate surface.

After using detergent, rinse the surface with clean water and dry with a soft cloth. There are a number of window cleaners on the market that can be used to prevent or remove rings and stripes from the surface after cleaning, with excellent results. Furniture polish should not be used because deposits of silicone wax on the surface can cause discolouration and stripes that can be very difficult to remove. Surfaces with heavy structure or matte surfaces are more difficult to clean than surfaces that are flat or easily structured. Stains and marks on structured surfaces can be removed with nylon brush and any of the cleaning agents listed above. Carefully read and follow the attached instructions for each treatment and cleaning agent.

MAINTENANCE OF METALS

Primarily clean metals with plain water and mild detergents and afterward wipe off any moisture so the surface is dry. When brushing and polishing different types of metals, Glanol, Håxans, Autosol or Bistro is recommended agents. Untreated metals should be polished regularly to maintain quality and luster. Metals naturally get a patina over time. Painted and coated metals should not be polished with abrasive cleaners. Carefully read and follow the attached instructions for each treatment and cleaning agent.

MAINTENANCE OF STONES

Stones are cleaned smoothly with a damp cloth and very mild detergent. Be aware and wipe up liquids on surfaces immediately. Marble and limestone are porous materials and can not handle acidic fluids with a pH below 7 such as wine, fruit juice, carbonic acid, vinegar and acidic cleaners. The acids do not affect the stone's strength, but causes cosmetic damage. When cleaning we recommend Akemi Triple Effect or soap and water. For extra protection and impregnation Akemi Nano Effect is used. A stone slab with a matte surface can be treated with a stone wax or stone oil as the surface becomes very dirt and grease-proof. The treatment with oil causes the stone to darken, where excess oil is dried off immediately. Carefully read and follow the attached instructions for each treatment and cleaning agent.

MAINTENANCE OF LEATHERS

All leathers are unique and needs to be lubricated regularly with a conditioner, leather oil or leather fat so it does not dry out and to get the longest life expectancy. Wearing, sunlight and fluids affect the natural protection of the leather. Aniline and semi-aniline leather need some more care and maintenance compared to a completely pigmented or protected leather. In case of any stains the material can be cleaned with a slightly damp cloth and a special gall or leather soap and then treated with a moisturizing agent. When you lubricate or moisturize a leather upholstery it can become noticeably darker and to achieve a beautiful patina it is important to take good care of the leather. Do not rub during cleaning and never use gasoline and cleaning solutions, alkaline and acidic cleaning agents or abrasives. Carefully read and follow the attached instructions for each treatment and cleaning agent.

MAINTENANCE OF GLASS

Glass should be cleaned with cleaning equipment that is free of gravel and debris, to avoid scratching the glass surface. Only recommended detergents suitable for cleaning glass should be used. Gentle detergents are preferred. Do not clean glass when warm or in direct sunlight. Abrasive cleaners, powder-based cleaners, scouring powder or other strong agents should never be used to clean glass. Carefully read and follow the attached instructions for each treatment and cleaning agent.
