## DESCRIPTION

Forms flow into one another, occasionally create sharper edges underlining the beauty of forms, only to become soft and curved again, leading the gaze, calling for a tactile experience. The fine craftsmanship of processing the solid material, solid wood, creates extremely soft and fluid lines. The high level of final refinement evokes an impression of a curved form, of an ongoing flow of unique material surface. The material's structure generates a texture underlying the flow. An optical illusion of sorts ensues, visually alluring, without disturbing the function, accentuating the strength and pliability of the raw material by masterfully processing a delicate idea. The beauty of strong geometry has been softened by visible structure of the material, wood, adaptable in terms of colour and final processing, as well as in dimensions.

## PRODUCTION PROCESS

Tables are crafted from carefully selected, high-quality solid wood, chosen for its durability and distinctive natural grain. Each piece of wood is precisely cut and shaped to achieve clean lines and balanced proportions. Skilled artisans meticulously assemble the components using traditional joinery techniques, ensuring lasting strength and stability. Surfaces are finely sanded to enhance the wood's texture and prepare it for finishing. The final stage involves applying a chosen finish - whether natural oil, wax, or another treatment - to protect the wood and highlight its organic beauty. The result is a versatile, handcrafted table that seamlessly blends functionality with timeless design.
