

Munro Vitrine

Walnut

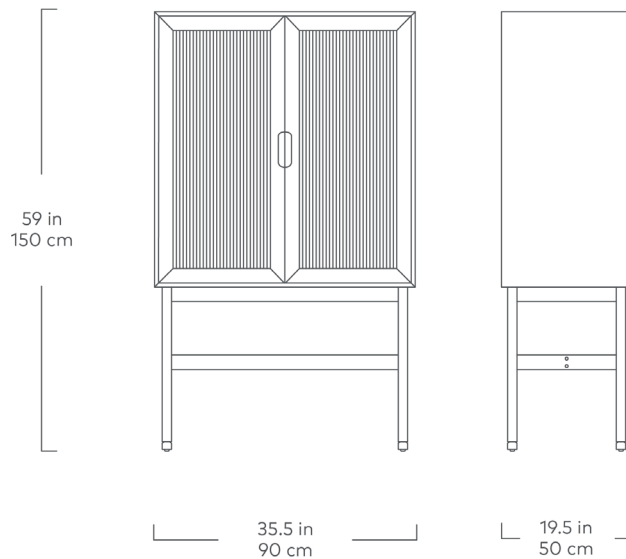

White
Oak

Our bespoke Munro Vitrine is the ideal place to keep your favorite treasures safely tucked away. Fluted glass doors allow you to admire what's within while maintaining an air of mystery and four adjustable interior shelves give you the flexibility to find an arrangement that works for you. Considered design elements like soft-close doors, magnetic closures, and recessed handles prove no detail is too small. The options are truly endless for a piece this versatile— use it to display your heirloom dishware in the dining room, as a tasteful catch-all for board games in the living room, or as a stylish way to showcase your shoe collection in your bedroom.

Design Trade Professionals: We aim to keep our designs in stock and ready to ship quickly for projects on a tight timeline. Designs may be customized with COM and alternate finishes (minimum quantities may apply). Visit gusmodern.com for more information about our Trade & Contract programs.

Munro Vitrine

- Main structure is constructed with engineered wood core for strength and stability, surface faced with thick, real wood Oak or Walnut Veneer.
- Features 2 doors with ¼" fluted glass inlay, surrounded by solid wood frames.
- Soft close doors, magnetic closures, recessed finger pulls and adjustable hinge hardware.
- Doors reveal 2 storage compartments, each with 2 adjustable shelves for efficient storage space.
- Vertical center brace for additional stability.
- Vitrine is finished in Rubio® Monocoat - a durable, matte, oil-based protector designed to highlight the beauty of natural wood.
- Wood finish is certified 0% VOC and is an all-natural, environmentally friendly product.
- Surface can be revitalized as desired. Visit Rubio® Monocoat website for more information.
- Power-coated black steel legs.
- Non-marking leveler feet can be adjusted for stability on uneven floor surfaces.
- Assembles easily with provided hardware. Anti-tipping hardware provided.
- Wood is a natural material, with variations in grain pattern and colour that make each design unique.
- CARB (California Air Resources Board) Phase II compliant.
- It is normal for solid wood to expand and shrink as a result of variations in environmental humidity. A consistent humidity level of approximately 50% is recommended to prevent cracks and surface splits.
