PK25™
PRODUCT FACT SHEET

PK25™

The PK25™ was designed by Poul Kjærholm for his final graduation project at the School of Arts and Crafts in 1952. Also known as the 'Element' chair, the PK25 is a striking example of Kjærholm's eagerness to transform common, industrial materials into striking works of art. Kjærholm was determined to reduce the chair to a single piece of each material, resulting in its overarching hallmark: the continual steel frame that bends through the form without interruption.

ABOUT THE DESIGNER

Poul Kjærholm was a trained cabinet maker and continued his studies at the Danish School of Arts and Crafts in Copenhagen. He had a particular interest in different construction materials, especially steel, which he considered a natural material with the same artistic fineness as other natural materials. Poul Kjærholm was first employed at Fritz Hansen for about a year, where he designed a number of noteworthy chair prototypes. In 1955, Poul Kjærholm initiated his collaboration with manufacturer Ejvind Kold Christensen, which lasted until Kjærholm's death in 1980. In 1982, Fritz Hansen took over the manufacture and sales of "The Kjærholm Collection", which was developed over the period 1951 to 1967.
