

The chair's mode of expression clearly reflects Wegner's personal approach to design. It is harmonious and with finely sculptured features. Everything down to the smallest detail is well planned. The CH33 is based on the idea of creating an attractive and sturdy chair with sensible ergonomics while maintaining a finer dimension in the wood where possible. Hans J. Wegner CH33 1957 Therefore, the tapered legs are thickest where they need to support load-bearing joints with the seat's rails and become slender closest to the floor.

DESIGNER

Danish architect Hans J. Wegner [1914-2007] is considered a pioneering furniture designer of the twentieth century. Often referred to as the master of the chair, Wegner created almost 500 in his lifetime – many of them considered masterpieces. Wegner was part of the spectacular generation that created what is today referred to as 'the Golden Age' of modern Danish design. Almost all of the world's major design museums, from the Museum of Modern Art in New York and Designmuseum Danmark in Copenhagen to Die Neue Sammlung in Munich, exhibit his works.
