CLEANING & MAINTENANCE OF MARBLE

Regular maintenance of marble will ensure long term use and value. Along with regular cleaning, we recommend sealing your marble twice a year. All collection pieces are for indoor use.

CLEANING:

Daily cleaning is done with a soft cloth wrung out in clean water. Avoid using acidic cleaners or any type of harsh chemicals on the marble. There are various treatments for marble furniture including wax, oil, and soap flake polishes, depending on desired finish. Below is one recommended treatments for marble surfaces.

TREATMENT:

1. Clean the marble using a clean cloth dampened with warm water.
2. Once the marble is dry, apply Vaseline oil to a clean soft cloth or sponge.
3. Rub the oil into the marble, treating the entire surface of the marble surface.
4. Let the oil soak for about two hours, then remove any excess oil with a soft clean dry cloth.
5. Rub the surface with a marble sealant, treating the entire surface of the furniture piece evenly.
6. Leave the sealant for two to four hours, or as the bottle instructions indicate.

NOTE:

For quick touch-ups, use a soft cloth and warm, distilled water to clean marble - using another cloth to dry the surface. Marble is very prone to water spots, so it's important to dry it instantly after every cleaning process.

Clean spills on marble as soon as possible to prevent stains. Be careful not to place anything hot on your marble. The safest way to polish marble is with a chamois on a damp surface.
