Assembly instruction

Buffalo Sports Elite 3 Piece High Jump Crossbar

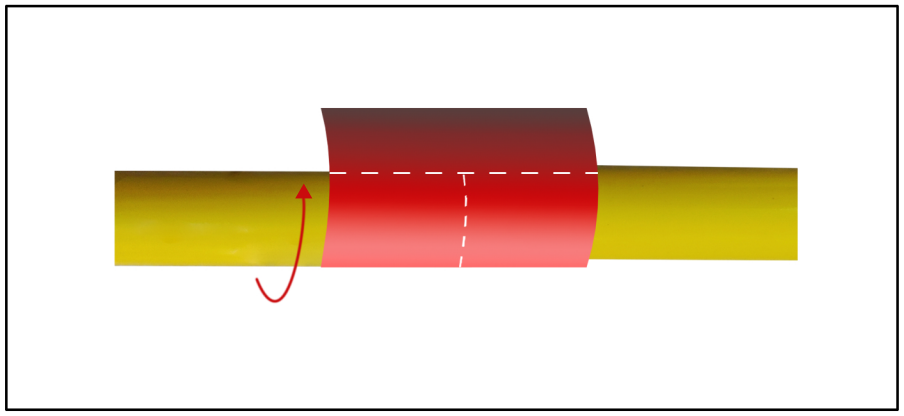

1.Spread glue evenly over the insert tube.

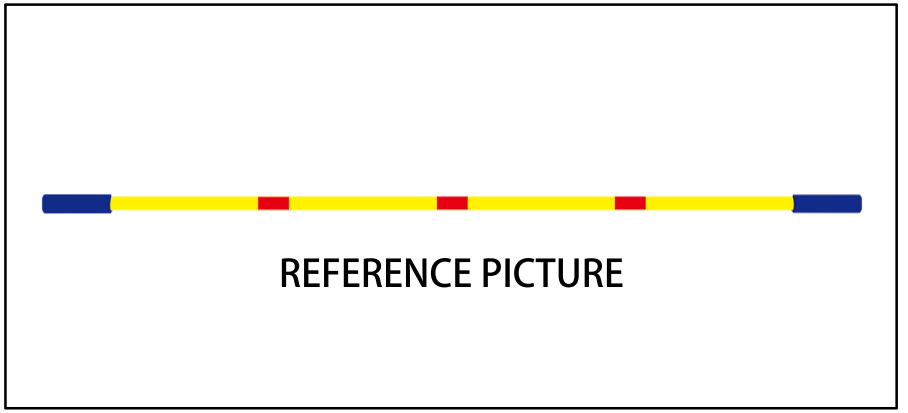

Ensure the glue is in a Zig Zag on <u>both</u> sides of the bar. DO NOT apply the glue in a straight line as it will void warranty

2.Spread glue evenly over the insert tube, Note that the connection must correspond to the horizontal lines drawn on the surface. Single lines correspond to single lines, and double lines correspond to double lines. Because of the glue is quick drying glue, please turn & push the insert tube quickly, so that the glue is fully in contact with the inner walls of the left and right crossbar.

3.After the assembly is complete, paste a red sticker on the interface position.

4.After the above steps are complete, let the crossbar sit for 10-15 minutes to allow the glue to dry completely.
