

# Netball stands with filled base

## Manual Instruction

- ① Fill the base with Water or Sand around in 31-32 Kgs.

- ② Install the plastic plug.

- ④ Adjust the height as requirement and then tighten the knobs.

- ⑤ Insert the net into the ring hole like picture 1, then put the net like picture 2. Repeat the operation one by one, until the whole net inserts into the each ring hole.

- ③ Insert the Part A(axle) into Part B hole position, then install the Part C (Support frame) with Pole and Base as picture shows.
