Gibson

Dual-Chamber Spinner Hangers

Motor-Driven Shaft spins workpiece fixtures for even, 360° exposure of part surfaces.

> PLC Programming assures precise coordination between automated functions.

Gibson Spinner Hangers provide an ideal solution for batch blasting many types of parts too fragile or awkward for other methods of automated finishing. These systems play a profit-boosting role across a broad range of metal-intensive industries by improving quality and efficiency during the cleaning, peening, prepping and finishing of almost any workpiece suitable for mounting on hooks.

Our systems include two work chambers mounted on an indexing turntable. As the turntable steps through programmed positions, one chamber exposes parts to a contained blast stream emanating from high-efficiency wheels while the other opens to the operator, who loads and unloads parts from the un-contained chamber. To assure uniform coverage, a spindle rotates the hangers within the working chamber's blast envelope.

Like all Gibson systems, our Spinner Hangers are easy to operate and install. Plus, they deliver consistent results whether working intermittently or non-stop in a multishift production facility.

PLC programming assures repeatable performance cycle after cycle, and cast liners on work-chamber walls extend equipment life.

For additional information about our line of Spinner Hanger Blasters, refer to the next page. Contact Gibson and visit our website at **www.gibson-equipment.com** where you can see videos of our Spinner Hangers in action.

Factory Options: Variable frequency drive for blast wheels • Rotary scalping screen • Safety light curtain • Abrasion-resistant liners & packages

High-capacity blast machine performs both *Table* and *Spinner Hanger* operations, providing the versatility to meet various customer needs.

Gibson offers single chamber systems for heavier, harder to load parts. Optional Y-track upgrades branch two rails so one fixture can be loaded and unloaded while parts on the second fixture undergo blasting.

Gibson also offers custom fixture designs to maximize equipment efficiency.
