

POSI SEAL

SAFETY SYSTEM

HOW THE POSI SEAL SAFETY SYSTEM PROTECTS YOU:

- This system is HUMAN ERROR-PROOF because it requires no action or knowledge from the operators to keep the top closure sealed while the bulk blaster is pressurized. The most common cause of top closure injury is operator error.
- This FULLY AUTOMATIC safety system seals off the top closure automatically whenever the bulk blaster is pressurized.
- This system is the SAFEST OPTION for bulk blaster injury prevention available today.

Available on ALL Pirate Brand® Bulk Blasters

HUMAN ERROR-PROOF • FULLY AUTOMATIC • SAFEST OPTION

SAFETY IS OUR PRIORITY

All Pirate Brand Bulk Blasters come standard with our safety valve to test for pressure in the pressure vessel.

LOCK OUT TAG OUT SAFETY SYSTEM

Prevents Unauthorized or Untrained Personnel from Accessing Bulk Blaster Top Closure

Available for Pirate Brand® and similar
bulk blasters with 10" & 16" closures.

The Safety Cable
prevents the Lock Out
System from falling off
the top of the vessel.
