

Envoy Ergonomic Chair CHR469	Pursuit Ergonomic Chair CHR455	Facet Ergonomic Chair CHR456	J3 Ergonomic Chair CHR456	Intuition Ergonomic Chair CHR472	Vert Ergonomic Chair CHR458
---------------------------------	-----------------------------------	---------------------------------	------------------------------	-------------------------------------	--------------------------------

Our most popular chair features the widest seat pan, widest adjustable arm width, and thickest seat cushion. It accommodates a wide range of body types and shapes, ideal for teams and home offices.	A contoured seat pan and unique design make this one of our most popular choices for an office or gaming chair. The headrest is comfortable (not removable). Not recommended for very large users due to the narrower contoured seat.	The extensive back height adjustment range and cushioned, depth-adjustable lumbar support make this chair a comfortable choice for most people between 5'5" and 6'4" tall. It has a large back height adjustment range and low minimum back height.	Features like the deepest recline, softest armrests, and leather seat offer comfort and relaxing support. An excellent option for taller people due to the seat height range.	The most breathable UPLIFT Desk chair thanks to its mesh seat and back, this customer favorite features intuitive controls and self-adjusting lumbar support that cradles the lower back.	Designed with an elastomer spine, this unique chair cradles the back and flexes to allow supportive side-to-side movement. A great option for users below 5'6" due to the low minimum seat height, while the maximum seat height still fits tall users.
