FAA-S-ACS-29

Flight Instructor for Rotorcraft Category Helicopter Rating Airman Certification Standards

November 2023

Flight Standards Service
Washington, DC 20591

Foreword

The U.S. Department of Transportation, Federal Aviation Administration (FAA), Office of Safety Standards, Regulatory Support Division, Airman Testing Standards Branch, has published the Flight Instructor for Rotorcraft Category Helicopter Rating Airman Certification Standards (ACS) to communicate the aeronautical knowledge, risk management, and flight proficiency standards for a Flight Instructor Certificate in the Rotorcraft Category Helicopter Rating.

This ACS is available for download, in PDF format, from www.faa.gov.

Comments regarding this ACS may be emailed to acsptsinquiries@faa.gov.

The FAA created FAA-G-ACS-2, Airman Certification Standards Companion Guide for Pilots, to provide guidance considered relevant and useful to the community. The number of appendices in the ACS was reduced and much of the non-regulatory material was moved to the Airman Certification Standards Companion Guide for Pilots. Applicants, instructors, and evaluators should consult this companion guide to familiarize themselves with ACS procedures. FAA-G-ACS-2 is available for download, in PDF format, from www.faa.gov.

Introduction

Airman Certification Standards Concept

The goal of the airman certification process is to ensure the applicant possesses the knowledge, ability to manage risks, and skill consistent with the privileges of the certificate or rating being exercised, in order to act as pilot-in-command (PIC).

Safe operations in today's National Airspace System (NAS) require the integration of aeronautical knowledge, risk management, and flight proficiency standards. To accomplish these goals, the FAA drew upon the expertise of organizations and individuals across the aviation and training community to develop the ACS. The ACS integrates the elements of knowledge, risk management, and skill required for each airman certificate or rating. It thus forms a more comprehensive standard for what an applicant must know, consider, and do to demonstrate proficiency to pass the tests required for issuance of the applicable airman certificate or rating.

SAMPLE

Area of Operation I. Fundamentals of Instructing

Note: The evaluator must select Task E, Task F, and at least one other Task for initial flight instructor applicants. During a practical test for an added flight instructor rating or flight instructor reinstatement, the evaluator has discretion to evaluate the applicant on Fundamentals of Instructing.

Task A. Effects of Human Behavior and Communication on the Learning Process

References: FAA-H-8083-2, FAA-H-8083-9, FAA-H-8083-25

Objective: To determine the applicant understands human behavior and effective communication, can apply that knowledge, manage associated risks, demonstrate appropriate skills, and provide effective instruction.

Knowledge:	The applicant understands and explains:
<i>FI.I.A.K1</i>	Elements of human behavior, including:
<i>FI.I.A.K1a</i>	a. Definitions of human behavior
<i>FI.I.A.K1b</i>	b. Instructor and learner relationship
<i>FI.I.A.K1c</i>	c. Motivation
<i>FI.I.A.K1d</i>	d. Human needs
<i>FI.I.A.K1e</i>	e. Defense mechanisms
<i>FI.I.A.K2</i>	Learner emotional reactions, including:
<i>FI.I.A.K2a</i>	a. Anxiety and stress
<i>FI.I.A.K2b</i>	b. Impatience
<i>FI.I.A.K2c</i>	c. Worry or lack of interest
<i>FI.I.A.K2d</i>	d. Physical discomfort, illness, fatigue, and dehydration
<i>FI.I.A.K2e</i>	e. Apathy due to inadequate instruction
<i>FI.I.A.K3</i>	Teaching the adult learner.
<i>FI.I.A.K4</i>	Effective communication, including:
<i>FI.I.A.K4a</i>	a. Basic elements of communication
<i>FI.I.A.K4b</i>	b. Barriers to effective communication
<i>FI.I.A.K4c</i>	c. Developing communication skills

Risk

Management: The applicant is able to identify, assess, and mitigate risk associated with:

<i>FI.I.A.R1</i>	Recognizing and accommodating human behavior.
<i>FI.I.A.R2</i>	Barriers to communication.

Skills: The applicant exhibits the skill to:

<i>FI.I.A.S1</i>	Give examples of how human behavior affects motivation and learning.
<i>FI.I.A.S2</i>	Describe what the instructor can do to deal with:
<i>FI.I.A.S2a</i>	a. Serious abnormal emotional behavior
<i>FI.I.A.S2b</i>	b. Defense mechanisms
<i>FI.I.A.S3</i>	Use effective communication in ground and flight instruction.

Task B. Learning Process

References: FAA-H-8083-2, FAA-H-8083-9, FAA-H-8083-25

Objective: To determine the applicant understands the learning process, can apply that knowledge, manage associated risks, demonstrate appropriate skills, and provide effective instruction.

Knowledge:	The applicant understands and explains:
<i>FI.I.B.K1</i>	Definitions of learning.
<i>FI.I.B.K2</i>	Learning theory as it applies to ground and flight instruction, including:
<i>FI.I.B.K2a</i>	a. Behaviorism
<i>FI.I.B.K2b</i>	b. Cognitive Theory
<i>FI.I.B.K3</i>	Perceptions and insight.
<i>FI.I.B.K4</i>	Acquiring knowledge.
<i>FI.I.B.K5</i>	Laws of learning.
<i>FI.I.B.K6</i>	Domains of learning, including:
<i>FI.I.B.K6a</i>	a. Cognitive
<i>FI.I.B.K6b</i>	b. Affective
<i>FI.I.B.K6c</i>	c. Psychomotor
<i>FI.I.B.K7</i>	Characteristics of learning.
<i>FI.I.B.K8</i>	Scenario-based training (SBT).
<i>FI.I.B.K9</i>	Acquiring skill knowledge, including:
<i>FI.I.B.K9a</i>	a. Stages
<i>FI.I.B.K9b</i>	b. Knowledge of results
<i>FI.I.B.K9c</i>	c. How to develop skills
<i>FI.I.B.K9d</i>	d. Learning plateaus
<i>FI.I.B.K10</i>	Types of practice.
<i>FI.I.B.K11</i>	Evaluation versus critique.
<i>FI.I.B.K12</i>	Distractions, interruptions, fixation, and inattention.
<i>FI.I.B.K13</i>	Errors.
<i>FI.I.B.K14</i>	Memory, including:
<i>FI.I.B.K14a</i>	a. Sensory
<i>FI.I.B.K14b</i>	b. Short-Term Memory (STM) and Long-Term Memory (LTM)
<i>FI.I.B.K14c</i>	c. How usage affects memory
<i>FI.I.B.K14d</i>	d. Forgetting
<i>FI.I.B.K15</i>	Retention of learning.
<i>FI.I.B.K16</i>	Transfer of learning.

Risk

Management: The applicant is able to identify, assess, and mitigate risk associated with:

FI.I.B.R1 Inadequate or incomplete instruction.

- FI.I.B.R2* Lack of learner motivation.
- FI.I.B.R3* Recognizing and correcting learner errors.
-

- Skills:** The applicant exhibits the skill to:
- FI.I.B.S1* Apply educational theories to ground and flight instruction.
- FI.I.B.S2* Recognize and correct conditions that undermine the learning process.
- FI.I.B.S3* Plan for and use techniques, including realistic distractions that teach flight students how to manage a workload.

Task C. Course Development, Lesson Plans, and Classroom Training Techniques

References: *FAA-H-8083-2, FAA-H-8083-9, FAA-H-8083-25*

Objective: To determine the applicant understands the teaching process, can apply that knowledge, manage associated risks, demonstrate appropriate skills, and provide effective instruction.

- Knowledge:** The applicant understands and explains:
- FI.I.C.K1* Teaching, including:
- FI.I.C.K1a* a. Process
- FI.I.C.K1b* b. Essential skills
- FI.I.C.K2* Course of training.
- FI.I.C.K3* Preparation of a lesson, including:
- FI.I.C.K3a* a. Training objectives and completion standards
- FI.I.C.K3b* b. Performance-based objectives
- FI.I.C.K3c* c. Importance of Airman Certification Standards (ACS) in aviation training curricula
- FI.I.C.K3d* d. Decision-based objectives
- FI.I.C.K4* Organization of material.
- FI.I.C.K5* Training delivery methods, including:
- FI.I.C.K5a* a. Lecture
- FI.I.C.K5b* b. Discussion
- FI.I.C.K5c* c. Guided discussion
- FI.I.C.K5d* d. Cooperative or group learning
- FI.I.C.K5e* e. Demonstration-performance
- FI.I.C.K5f* f. Drill and practice
- FI.I.C.K6* Electronic learning (e-Learning).
- FI.I.C.K7* Instructional aids and training technologies, including:
- FI.I.C.K7a* a. Characteristics of effective instructional aids
- FI.I.C.K7b* b. Reasons for use
- FI.I.C.K7c* c. Guidelines for use
- FI.I.C.K7d* d. Types

FAA-G-ACS-2

Airman Certification Standards Companion Guide for Pilots

November 2023

Flight Standards Service
Washington, DC 20591

Foreword

The Federal Aviation Administration (FAA) developed this Airman Certification Standards Companion Guide FAA-G-ACS-2, for use with the Airman Certification Standards (ACS) for pilot certification. This guide, along with the regulatory material in the ACS, may assist an applicant preparing for the knowledge and practical test(s) that lead to pilot certification. This document is intended only to provide clarity to the public regarding existing requirements under the law or agency policies. The contents of this document do not have the force and effect of law and are not meant to bind the public in any way.

This guide and the ACS are available for download from www.faa.gov.

Comments regarding this document may be emailed to acsptsinquiries@faa.gov.

Why the FAA Created this Guide

The Federal Aviation Administration (FAA) publishes the Airman Certification Standards (ACS) to communicate the aeronautical knowledge, risk management, and flight proficiency standards for various certificates and ratings available to airmen. The ACSs are incorporated by reference into 14 CFR part 61; therefore, the material contained in the ACS is regulatory. This guide, FAA-G-ACS-2, provides additional information to the regulated community to facilitate airman testing. The ACS complies with the safety management system (SMS) framework that the FAA uses to mitigate risks associated with airman certification training and testing. Specifically, the ACS, incorporated by reference (IBR) into the Federal Aviation Regulations, conforms to four functional components of an SMS:

- Safety Policy—Each ACS specifies the Tasks selected by the FAA from the regulatory Areas of Operation. Evaluators formulate a Plan of Action that determines if an applicant can operate safely within the NAS. The ACS represents the FAA's commitment to continually improve safety by including risk management elements in addition to knowledge and skill elements;
- Safety Risk Management that complies with the Administrative Procedures Act (APA) allows the FAA to work with internal and external stakeholders during document formulation. The public at large and stakeholders have an additional chance to provide input during public comment periods;
- Safety Assurance processes ensure a methodical and reasoned incorporation of changes arising from safety recommendations or new developments in aviation; and
- Safety Promotion in the form of engagement and discussion between both external stakeholders (e.g., the aviation training industry) and the FAA policy divisions going forward will determine the content of any ACS that publishes in a Notice of Proposed Rulemaking.

The FAA develops the ACS documents along with associated guidance and updated reference material in collaboration with a diverse group of aviation training experts. The goal is to drive a systematic approach to all components of the airman certification system, including knowledge test question development and conduct of the practical test. The FAA acknowledges and appreciates the many hours that these aviation experts have contributed toward this goal. This level of collaboration, a hallmark of a robust safety culture, strengthens and enhances aviation safety at every level of the airman certification system.

Note: *This document does not apply to the Practical Test Standards.*

The Non-Regulatory Material in this Guide

This guide provides test preparatory information for an applicant seeking a certificate or rating. This guide also provides a list of references and abbreviations/acronyms used in any ACS and a practical test checklist for use by an applicant. The material in this guide is non-regulatory and may contain terms such as should or may:

- Should indicates actions that are recommended, but not regulatory.
- May is used in a permissive sense to state authority or permission to do the act prescribed.

This document is not legally binding and will not be relied upon by the FAA as a basis for affirmative enforcement action or other administrative penalty. Conformity with the guidance is voluntary only and nonconformity will not affect rights and obligations under existing statutes and regulations.

Section 1: Knowledge Test Eligibility, Description, and Registration

Eligibility

For detailed airman knowledge test eligibility and applicable prerequisites, applicants should refer to the 14 CFR part 61 rules that apply to a specific certificate or rating.

Steps for Knowledge Test Registration

Step 1. Obtain an FAA Tracking Number

The FAA Airman Knowledge Test registration system requires the applicant to have an FAA Tracking Number (FTN). Applicants may obtain an FTN through the [Integrated Airman Certification and Rating Application \(IACRA\) website](#).

[This video](#) describes creating an IACRA account and obtaining an FTN. The specific instructions begin at the 14-minute mark.

Step 2. Create an Account with PSI

After obtaining an FTN, applicants should create an account with the FAA's contracted testing vendor, PSI, a professional testing company which operates hundreds of test centers. Visit [PSI's website](#) for information on authorized airman knowledge test centers and how to register, schedule, and pay for an Airman Knowledge Test:

Note: *The IACRA and PSI systems share data that verifies the applicant's FTN and name based on the information input into IACRA by the applicant. The PSI system does not allow applicants to make changes to their name. Applicants who need to make a correction to their name should process that correction in the IACRA system. The applicant's name correction will appear in the PSI system once the applicant logs back into the PSI system and refreshes their account.*

Step 3. Select Test and Testing Center

After obtaining an FTN and creating an account with PSI, applicants may schedule knowledge tests. The PSI system walks the applicant through the process to select a test center in their area and select one or more specific knowledge tests.

Step 4. Select an Available Time Slot

After selecting the test center and test, the applicant may select a date and time slot.

Step 5. Pay for Test

After selecting an available time slot, the PSI system prompts the applicant to pay for the test. After completing this step, the applicant receives an automated email confirmation from PSI.

Applicants are required to meet any applicable Airman Knowledge Test eligibility requirements before arriving at a test center to take a specific knowledge test.

Testing Procedures for Applicants Requesting Special Accommodations

Applicants may request a special accommodation for their airman knowledge test through the PSI test registration and scheduling process. The process allows the applicant to select the specific accommodation(s) needed in accordance with the Americans with Disabilities Act (ADA). The PSI special accommodations team will work with the applicant and the selected testing center to provide appropriate accommodation(s). The PSI special accommodations team may request medical documentation for verification.

Acceptable Forms of Identification

14 CFR part 61, section 61.35, requires an applicant for a knowledge test to have proper identification at the time of application. Before beginning an Airman Knowledge Test, test center personnel will ask to see the applicant's state or federal government-issued photo identification. The identification must contain the applicant's photograph, signature, and date of birth. If the applicant's permanent mailing address is a PO Box number, the applicant must provide a current residential address.

Acceptable Forms of Applicant Address Verification

The table below provides examples of acceptable identification.

All Applicants	U.S. Citizens & Resident Aliens	Non-U.S. Citizens
Identification information must be: <ul style="list-style-type: none"> ✓ valid ✓ current Identification must include all of the following information: <ul style="list-style-type: none"> ✓ photo ✓ date of birth ✓ signature ✓ physical, residential address 	<ul style="list-style-type: none"> ✓ Identification card issued by any U.S. state, territory, or government entity (e.g., driver permit or license, government identification card, or military identification card) <p style="text-align: center;">or</p> <ul style="list-style-type: none"> ✓ Passport <p style="text-align: center;">or</p> <ul style="list-style-type: none"> ✓ Alien residency card 	<ul style="list-style-type: none"> ✓ Passport <p style="text-align: center;">and</p> <ul style="list-style-type: none"> ✓ Driver permit or license issued by a U.S. state or territory <p style="text-align: center;">or</p> <ul style="list-style-type: none"> ✓ Identification card issued by any government entity

Airman Knowledge Test Description

The airman knowledge test consists of multiple-choice questions. A single correct response exists for each test question. A correct response to one question does not depend upon, or influence, the correct response to another.

Taking the Knowledge Test

Before starting the actual test, the test center provides an applicant with the opportunity to practice navigating the test software. This practice or tutorial session may include sample questions to familiarize the applicant with the look and feel of the software (e.g., selecting an answer, marking a question for later review, monitoring time remaining for the test, and other features of the testing software). PSI also provides sample tests for registered users on their [website](#).

Acceptable and Unacceptable Materials

The applicant may use the following aids, reference materials, and test materials when taking the knowledge test provided the material does not include actual test questions or answers:

Acceptable Materials	Unacceptable Materials	Notes
Supplement book provided by the proctor	Written materials that are handwritten, printed, or electronic	Testing centers may provide calculators and/or deny the use of personal calculators.
All models of aviation-oriented calculators or small electronic calculators that perform only arithmetic functions	Electronic calculators incorporating permanent or continuous type memory circuits without erasure capability	Proctor may prohibit the use of an applicant's calculator if the proctor is unable to determine the calculator's erasure capability
Calculators with simple programmable memories, which allow the addition to, subtraction from, or retrieval of one number from the memory, or simple functions, such as square root and percentages	Magnetic Cards, magnetic tapes, modules, computer chips, or any other device upon which pre-written programs or information related to the test can be stored and retrieved	Printouts of data should be surrendered at the completion of the test if the calculator incorporates this design feature
Scales, straightedges, protractors, plotters, navigation computers, blank log sheets, holding pattern entry aids, and electronic or mechanical calculators that are directly related to the test	Dictionaries	Before, and upon completion of the test, while in the presence of the proctor, actuate the ON/OFF switch or RESET button, and perform any other function that ensures erasure of any data stored in memory circuits
Manufacturer's permanently inscribed instructions on the front and back of such aids (e.g., formulas, conversions, regulations, signals, weather data, holding pattern diagrams, frequencies, weight and balance formulas, and air traffic control procedures)	Any booklet or manual containing instructions related to the use of test aids	Proctor makes the final determination regarding aids, reference materials, and test materials

Test Taking Tips

When taking a knowledge test, applicants should:

- Read the test instructions carefully;
- Mark difficult questions for later review in order to use the available time efficiently;
- Examine graphs and notes that pertain to the question;
- Request and mark a printed copy of any graph while computing answers, if needed;
- Understand that since only one answer is complete and correct, the other possible answers are either incomplete or erroneous;
- Answer each question in accordance with the current regulations and guidance publications; and
- Answer all the questions before time allotted for the test expires.
- Review 14 CFR part 61, section 61.37 regarding cheating or other unauthorized conduct.

This Federal Aviation Administration (FAA) *Flight Instructor for Rotorcraft Category Helicopter Rating Airman Certification Standards (ACS)* document provides the aeronautical knowledge, risk management, and flight proficiency standards for flight instructor certification in the rotorcraft category helicopter class (CFI), including fundamentals of instructing (FOI). The FAA ACS comprise the testing standard for practical tests and proficiency checks for persons seeking or holding an airman certificate and/or rating. This book also includes the *Airman Certification Standards Companion Guide for Pilots (FAA-G-ACS-2)*, with additional information relevant to applicants seeking FAA airman certification.

The goal of the airman certification process is to ensure the applicant possesses the knowledge, ability to manage risks, and skill consistent with the privileges of the certificate or rating being exercised, in order to act as pilot-in-command (PIC). The ACS is the guide for students, instructors, and evaluators to understand what applicants must know, consider, and do to pass the FAA Knowledge Exam and practical (checkride) and earn their pilot certificate or rating.

FAA Certification Standards available from ASA:

Airman Certification Standards

- **Private Pilot** Airplane
- **Private Pilot** Rotorcraft Helicopter
- **Instrument Rating** Airplane
- **Instrument Rating** Helicopter
- **Commercial Pilot** Airplane
- **Commercial Pilot** Rotorcraft Helicopter
- **Flight Instructor** Airplane
- **Flight Instructor** Rotorcraft Helicopter
- **Airline Transport Pilot and Type Rating** Airplane
- **Remote Pilot** Small Unmanned Aircraft Systems
- **Aviation Mechanic** General, Airframe, Powerplant

Practical Test Standards

- **Aircraft Dispatcher**
- **Flight Instructor** Instrument Airplane & Helicopter
