

EasyNest Online

Web based nesting system

EasyNest Online is an easy-to-use web-based nesting system to program standard cutting machines. Generate programs that use the full potential of your machine automatically without being a process expert. The subscription is for one year.

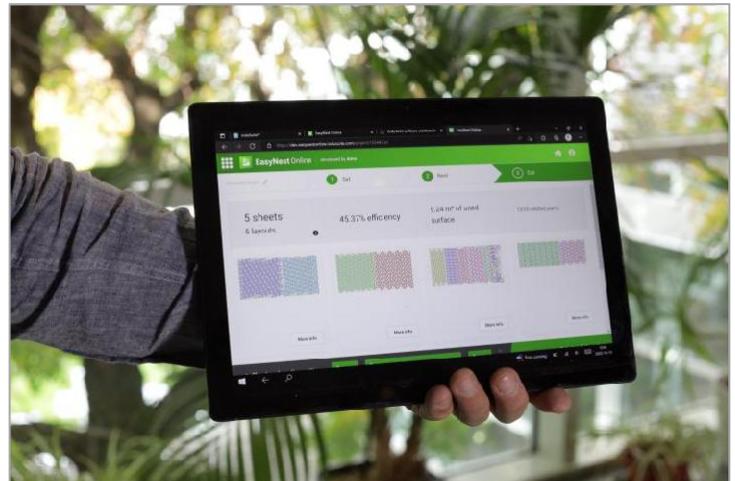

- Automate nesting to maximize plate utilization
- Automatic cut optimization
- Easy to use
- Quick ROI
- Works with most brands

Visit indusuite.com for more information.

EasyNest Online enables you to do nesting without having to install or maintain a CAD/CAM system

Industry

- Light Fabrication
- General Fabrication
- Repair Maintenance

Improve your material efficiency by in average 6% compared to manual or competitor products

EasyNest Online

WELDCLOUD SYSTEM

Automatic DXF import, nesting and program generation with optimized cutting parameters and best practices at the push of the button to maximize your productivity of your cutting machine. Import your part geometry by easy file upload to EasyNest Online and define the quantity to be processed. Bulk upload of multiple geometries is also possible

Easy to use :

Step 1

Import your part geometry by file upload to EasyNest Online and define the quantity to be processed

Step 2

Define your material and nesting settings. EasyNest Online will automatically use the best cutting technology for your job

Step 3

EasyNest Online will use advanced algorithms to nest your parts on the provided sheets to optimize material usage and quality

Step 4

Download your NC program for your cutting machine from EasyNest Online to copy it to your cutting machine

Requirements	
Device for accessing application	Up to date internet browser
Network requirement	Internet access through Ethernet cable or via Wi-Fi

Ordering Information	
Description	Part Number
