

**Detroit Speed
Leaf Spring Plate Kit
1982-2004 Chevy S10 Truck
P/N: 040123DS**

The Detroit Speed Leaf Spring Plate Kit is a 100% bolt-on replacement for the factory leaf spring plate of your 1982-2004 Chevy S10 truck. The lower spring plate is designed to accommodate a 1/2" shock stud or a shock with an integral stud. The plates are symmetrical to allow for the factory style rear shock arrangement or a staggered shock arrangement. The spring plates have been powder coated black for durability.

Item	Part Description	Quantity
1	Lower Spring Plate	2
2	Instructions	1
3	1/2"-13 x 3" L Gr 8 Flanged Hex Bolt Yellow Zinc	2
4	1/2"-13 Flanged Prevailing Torque Lock Nut	2
5	1/2" ID x 1" OD x 1/2" L Spacer Black Anodized	2

IMPORTANT:

All work should be performed by a qualified technician. Please read the entire set of instructions and fully understand all of the steps involved before beginning the project. Always make sure to wear the appropriate safety equipment for the job and properly support the vehicle. If you have any questions before, during, or after the installation, feel free to contact Detroit Speed by phone at (704) 662-3272 or by email at tech@detroitsspeed.com.

Installation Instructions

1. To begin installation, raise and support the front and rear of the truck. Disconnect the shocks from the lower leaf springs plates.
2. Remove the factory lower spring plates from the truck.
3. Install the DSE lower spring plates so the U-bolts pass through the holes in the spring plates. Make sure the leaf spring bolt lines up with the hole in the spring plates.
4. Use anti-seize on the threads of the U-bolts. Draw up the U-bolts until they are snug. Continue to tighten the U-bolts in a cross pattern and torque to 85 ft-lbs. (Figure 1).

Figure 1 - Install Spring Plates

5. Re-install the shocks to the lower spring plates using the supplied hardware. Use anti-seize on the threads of the lower shock bolt and torque to 65 ft-lbs. (Figure 2).

Figure 2 - Re-install Shocks

6. The installation is now complete.
