Global Industrial™ Self-Dumping Forklift Hopper W/Bump Release, 2 Cu. Yd, 6000 Lbs, Blue/Black

★★★★★ (4)

Ships within 1 Business Day

Product Description

✓ 2 yd^3 volume, 6000 lbs weight capacity
✓ Automatically returns upright and ready for reloading
✓ Extended sides prevent side-wise scattering of material

Utilizing an integrated release mechanism, the 2 yd^3 Global Industrial™ Self-Dumping Forklift Hopper automatically dumps when the bumper release makes contact with the side of a dumpster, then automatically returns to an upright, locked position ready for reloading.

The hopper has a dump angle of approximately 67°, to ensure it empties completely. Sturdy 8-gauge steel and continuous welding helps extend the hopper's service life. The included safety restraint gets wrapped around the mast of the forklift to prevent the hopper from coming off the forks. Limited 1-Year Warranty.

Warning: Do not use the welded hole plates on the hopper for hoisting. They are not designed or intended for lifting.

NOTE: OSHA requires contacting the manufacturer of your fork truck for written approval for the use of any fork truck attachments.

- 4' long cable allows the hopper to be manually released from the forklift cab
- Stackable for storage, if multiple hoppers are alternatingly turned 90° from the previous hopper
- Durable scratch-resistant blue enamel finish on hopper & black powder coat finish on forklift base

Specifications

Weights & Dimensions

Length	68-5/16 in
Width	56 in
Height	51-13/16 in
Weight Capacity	6000 lbs
Weight	826 lbs
