Global Industrial® Insulated Drum Heating Blanket For 55 Gal Drum, 100°F Fixed Temp, 120V

★★★★★ (0)

Ships within 1 Business Day

Product Description

The 55-gallon drum and barrel heater from Global Industrialoffers a state-of-the-art heating system that is far superior to band heaters, which localize the heat to only one spot. The Global Industrialdrum heater encases the entire drum in a heating blanket, insulating the entire drum and distributing the heat across the entire surface. The Global Industrial® 55 Gallon Drum Heater runs at 800 watts so that things warm up quickly, then it automatically cuts back to only 400 watts to maintain the temperature. It is water-resistant and can be used on poly and steel drums. Another great feature is the preset thermostat which limits

the maximum temperature of the contents to approximately 100 °F. Thisdrum heater is very easy to install. ETL certified to UL & CSA safety standards.Fixed preset internal thermostat prevents product temperature from going above 100 °F (± 5 °F / 3 °C). Deliver safe, uniform heat to temperature-sensitive materials. Preserve expensive materials without overheating or burning. Prevent product waste by safely maintaining consistent temperatures. Works on both steel and poly drums.

Specifications

Weights & Dimensions

Length	82 in
Width	36 in
Height	3/4 in
Weight	9 lbs
Cord Length	6 ft
Thickness	3/4 in

Product Details

Type	Fixed Temperature Blanket Heater
Color	Blue
Amperage	6.67 A
Max Temperature	100 °F
For Use With	55 Gallon Steel & Poly Drums
Wattage	800 W
Voltage	120 V
Watts High	800 W
Material	Vinyl
Plug Type	NEMA 5-15

Manufacturers Part Number	246471
Max Exposure Temperature	110 °F
Min Exposure Temperature	90 °F
Brand	Global Industrial

Warranty

Warranty	1 yr

Compliance & Certifications

Certifications	ETL, UL, CSA, CE
