Heatstar Pro Series Indirect Fired Heater, 122000 BTU

★★★★★ (0)

Ships within 1 Business Day

Product Description

HeatStar pro-series HSP100ID is an indirect fired heater that provides 122,000 BTU per hour. The HSP100ID is an ideal heating solution when paired with optional 25' of 14" ducting and a remote thermostat. This heater is ideal for delivering even heat to both event tents and construction sites with clean fresh heated air. You can place the heater outside the space and duct the warm air in or for a fuel savings you can place the heater in the space to be heated and vent the exhaust out. Either way it is hard to beat the comfort and safety of indirect heat. Indirect fired heaters are highly efficient devices that provide large volume of 100% clean, dry and fume free warm air. They are best for places with limited ventilation like shops, event tents, food preparation areas, exhibition halls, and construction sites. They can

be used with optional flexible ducting that spreads the warm air around easily.

Features:

- Standard heated fuel filter for more reliable cold starts
- 17 gal fuel tank
- Solid rubber wheel over a poly propylene hub
- 120V
- 7 A
- IP41 rated
- 800 CFM
- Runs on diesel (1 or 2), kerosene, fuel oil, jet fuel
- cULus listed, CSA certified
- Limited warranty of 1 year

Specifications

Weights & Dimensions

Length	48-5/8 in
Width	22-5/8 in
Height	39-3/8 in
Weight	134.5 lbs
Coverage Area	2900 ft²

Product Details

Type	Indirect Fired Heater
CFM	800 CFM
Max Run Time	18.8 hr
Color	White
Amperage	7 A

Fuel Tank Capacity	17 gal
Voltage	120 V
Includes	Water-Resistant Control Box, HD Duct Adapter
Material	Steel
Ignition Type	Electronic
Manufacturers Part Number	HSP100ID
BTU	122000 BTU
Fuel Type	Diesel, Kerosene
Thermostat	Yes
Brand	HeatStar

Warranty

Warranty	1 yr

Compliance & Certifications

Certifications	cULus, CSA
