Product Description

The North Butyl™ - B131 is a smooth finish unsupported 11" Butyl glove that is 13mil thick. The solvent-based Butyl material provides the highest permeation resistance to vapors and gases as well as exceptional resistance to a broad range of toxic chemicals; this makes it the only suitable glove choice for many critical applications.

Features:

- Exceptional resistance to a broad range of toxic chemicals: making it the only suitable for many critical applications
- Highly resistant to ketones (MEK: MIBK: acetone) and esters (tricresyl phosphate: amyl acetate: ethyl acetate)
- Solvent based: multi-dip manufacturing process provides multiple layers of polymer (like a glove within a glove) which results in a glove of superior quality
- Butyl provides the highest permeation resistance to vapors and gases
- It is recommended that product stored in original packaging in a cool dry place away from direct sunlight or other strong light. Away from chemicals. Recommended temperature range: 50°F to 86°F (10°C to 30°C)
- Chemical Permeation Resistance: Yes minute (time unit)
- Available sizes: 7-11
