Product Description

Molded Fiber Glass Tray 8083005167 ESD Stacking Box, Top Overall 23-3/8"L x 12"W x 6"H

ESD-safe stacking containers provide optimal product protection with exceptional weight-carrying capability and possess superior physical properties over thermoplastic and corrugated products. They will not bend or sag under heavy loads and can be readily integrated into automated applications.ESD-safe conductive products have a surface resistivity of less than 10^5 to 10^6 ohms. Fibrestat products meet or exceed ANSI/ESD

S20.20 standard for ESD protection. ESD stacking containers ensure optimum space utilization during assembly operations and may be used to form mobile work stations. Fiberstat stacking containers ensure complete protection from electrostatic discharge for the life of the product. They may be used consistently in temperatures ranging from -60°to 250°F (-51°to 121°C) and are resistant to cutting oils, greases, solvents, mild acids and alkaline solutions within a pH rating of 3.0 - 10.0. Stacking containers are easily cleaned in hot water or steam with standard detergents. Optional Lids are available for certain models.

Specifications

Weights & Dimensions

Length	23-3/8 in
Width	12 in
Height	6 in
Size (L x W x H)	23-3/8 x 12 x 6 in
Inside Length	21 in
Inside Width	11 in
Inside Height	5-7/8 in
Inside Bottom Length	21 in
Inside Bottom Width	11 in

Product Details

Assembly Required	No
Type	ESD Storage Tote
Color	Black
Lid	No
Material	Fiberglass
Package Quantity	6
Manufacturers Part Number	8083005167

MFG Tray Molded Fiberglass Fibrestat ESD Stacking Tote, 23-3/8"L x 12"W x 6"H, Black - Pkg Qty 6

Stack and/or Nest	Stack
Brand	MFG Tray
