Global Industrial™ 110 Gallon Drum Storage Safety Cabinet, 59"W x 34"D x 65"H, Manual Close

★★★★½ (2)

Ships within 1 Business Day

Product Description

✓ Built to contain two 55-gallon drum
✓ All-welded steel with high-visibility yellow finish
✓ Drum rollers & 350 lb capacity storage shelf

Specifically designed to safely store two 55-gallon drums of flammable liquids and smaller containers, the manual-close Global Industrial™ 110 Gallon Drum Storage Safety Cabinet

features rollers that keep the drums elevated off the cabinet's sump, while making it easier to load and unload drums. A steel shelf adds extra storage above the drums for accessories or smaller containers and is adjustable on 2-1/2" centers with a 350-pound capacity. Integrated 2" flame vents help remove flammable or caustic vapors from the interior which reduces the chance of ignition.

This model has two manual-close doors that swing on continuous piano hinges for added strength & safety with a recessed latch & a keyed lock. Its 3-point latching mechanism prevents prying for increased safety & security. The cabinet is made with reinforced double-walled all-welded steel with 1-1/2" of air space between walls with a high-visibility yellow powder coat finish that is scratch-resistant and protects the steel from corrosion. The air space provides heat resistance and helps to maintain a lower internal temperature in the event of a fire for NFPA 251-compliance. Meets NFPA Code 30, OSHA requirements, UFC and EPA compliant.

Additional safety features:

- Multilingual external warning sign
- Internal retention chain holds drums in place
- Grounding attachment points
- Entry latch also accepts an user-supplied padlock
- 2" raised, leak-proof door sill

NOTE: Some state and municipalities may require self-closing doors on flammable safety cabinets. This cabinet has manual closing doors, please review your local ordinances prior to purchasing to ensure compliance.
