Global Industrial™ Forklift Battery Transfer Platform, 4000 Lb. Capacity

★★★★☆ (4)

Ships within 1 Business Day

Product Description

✓ Platform Cap. of 4000 Lbs. and Winch Cap. of 1000 Lbs.
✓ Creates cost-effective portable battery changer
✓ Aligns easily with forklift's battery compartment

Convert your existing 27"W x 48"L pallet truck into a cost-effective portable battery changer. One person can load, unload and move forklift batteries. 2-1/4" diameter steel rollers and hand-crank winch with 6' pull strap and safety latch-hook help safely facilitate horizontal

battery transfer. Because the pallet truck's height is adjustable, it aligns easily with forklift's battery compartment; height to top of rollers is 2-5/8" above your pallet truck's forks. Front locking safety tabs secure battery to deck. All-welded steel construction with durable powder coat finish. 48"L x 33"W x 7"H overall (46"H to top of winch) with 40"L x 28"W usable deck.

Note: Pallet Truck is not included.
