Ships Same Day

Product Description

Landscapers and contractors are demanding more cordless alternatives to gas-powered outdoor power equipment. Makita is meeting demand with an expanding line of cordless OPE that includes the 18V X2 (36V) LXT® Lithium-Ion Brushless Cordless Couple Shaft Power Head. With zero emissions, lower noise and maximum versatility, the Power Head is a welcome solution for a range of trimming and cutting applications. It's powered by two 18V LXT® batteries (sold separately) for maximum performance and run time without the hassles of gas and without leaving the 18V battery platform. The Power Head is compatible with a variety of optional couple shaft attachments, with a lever style lock system for quick

tool-less installation and replacement. It can be used with multiple attachments for trimming, edging, cultivating, and brush cutting (sold separately). Note that kit XUX01ZM5 includes string trimmer attachment. Makita's efficient BL™ Brushless motor is electronically controlled to optimize battery energy use for up to 50% longer run time per battery charge than similar non-brushless tools. Electronic controls efficiently use battery energy to match the changing demands of the application for increased power and speed when needed. With no carbon brushes, the Makita BL™ Brushless motor runs cooler and more efficiently for longer life. For added protection, the Electronic Torque Control turns the motor off if the rotation speed suddenly slows down or stops, and the overheat warning system turns on an indicator light and is engineered to automatically stop the motor. Added features include a variable speed trigger, and reverse (clockwise) rotation system that allows the operator to quickly clear the brush cutter head of entangled weed and grass. It features Makita Extreme Protection Technology (XPT™). XPT™ is a protective seal inside the tool, and is engineered for improved operation in harsh conditions by channeling water and dust from key internal components. It's part of Makita's expanding 18V Lithium-Ion system, the world's largest cordless tool system powered by 18V Lithium-Ion slide-style batteries. Makita 18V Lithium-Ion batteries have the fastest charge times in their categories, so they spend more time working and less time sitting on the charger. For improved tool performance and extended battery life, Makita created Star Protection Computer Controls™. Star Protection is communication technology that allows the Star Protection-equipped tool and battery to exchange data in real time and monitor conditions during use to protect against overloading, over-discharging and overheating. For increased versatility, the tool can also be powered by Makita 18V LXT® and Compact Lithium-Ion batteries with the star symbol on the battery indicating Star Protection inside.

Specifications

Weights & Dimensions

Weight	13.1 lbs
Blade Length	17 in
Cutting Swath	17 in
Cutting Line Size	0.08 in
Max Cut Diameter	17 in

Product Details

Type	Power Head
Corded/Cordless	Cordless
Number of Trim Lines	2
Shaft Material	Aluminum
Batteries Included	No
Start Type	Trigger
Straight Or Curved Shaft	Straight
Battery System	LXT
Style	Handheld
Line Advance	Bump
Number of Batteries	2
Voltage	36 V
Manufacturers Part Number	XUX01ZM5
Charger Included	No
Engine/Motor Type	Electric (Battery)
Brand	Makita

Warranty

Warranty	3 yr

Compliance & Certifications

California Emission Compliant	Yes
