Ships in 7 Business Days

Product Description

Perfect for getting into hard-to-reach places, the versatile 428 Carbon Steel Brush is ideal for removing rust and corrosion, polishing metal surfaces, deburring, blending surface junctures, or cleaning electrical components. Can be used on materials like brass, copper, or other soft metals such as tools, door knobs, automobile parts and electrical contacts. Featuring a 3/4 In. (19.1 mm) diameter the brush is effective on flat surfaces and in hard-to-reach places. Pack includes two carbon steel brush accessories.

Features:

- Material - Carbon Steel Wire
- Ideal for cleaning and removing rust and corrosion from items made of brass, copper, gold or other soft ferrous metals-such as tools, door knobs, automobile parts and electrical contacts
- You can also use wire brushes to create an artistic effect on coarse-grained wood
- Its shape makes it well suited for cleaning flat surfaces
- Perfect for getting into hard-to-reach places like slots
