Shrinkfast Heat Gun w/ Safety Cage Assembly, Safety Trigger & Storage Case

★★★★☆ (2)

Ships within 1 Business Day

Product Description

This heat gun is great for quick and easy shrink wrapping and shrink-film processing. The shrink heating gun handles the toughest jobs using 212,000 BTUs of power. It can wrap a 40"W x 48"D x 60"H pallet in less than 2 minutes. The sleek, lightweight design only weighs 2.2 lbs. Its fan shaped combustor provides an even, steady heat pattern for consistent shrink-wrapping. The dead-man trigger automatically shuts off the flame when the trigger is released. The patented combustion cycle allows the flame to burn outside the nozzle while

remaining cool to the touch. The regulator with safety POL shuts off propane supply in case the hose gets cut or leaks. This heat gun is UL listed. This product has limited warranty 1 year.
