Model: WBB2213473

Machine Screw Anchor - 5/8-11 - Steel - Zinc Alloy Cone / Lead Sleeve , Pack of 25

★★★★★ (0)

Ships in 5 Business Days

Product Description

Machine screw anchors are typically used with light to medium-duty concrete, brick, or block. They require the use of a setting tool, with different diameters requiring different sized setting tools. When installed, force is transferred to the base material. If installed too closely to another anchor, the holding power may weaken.

Specifications

Weights & Dimensions

Size	5/8-11
Unit of Measurement	Inch (Imperial)

Product Details

Country of Origin	Import
Material	Steel
Package Quantity	25
