Product Description

Low-Profile Self-Dumping Steel Forklift Hoppers are Designed for Factories, Warehouses, and More.

The Global Industrial™ Forklift Hopper features a low profile design that puts it within easy reach. A single operator can easily dump the hopper contents by pulling the 4'L cable while seated in the forklift, and is balanced to tilt to 90° to fully complete the dump. The hopper automatically returns to the upright, locked position when lowered to the ground. Reinforced

and braced formed galvanized steel base and precision robotic welds provide a strong, industrial grade unit. Heavy duty safety chain secures the hopper to the forklift. Durable scratch-resistant blue enamel coated hopper features a black powder coated forklift base. **1 Year Limited Warranty.**

Warning: Do not use the welded hole plates on the hopper for hoisting. They are not designed or intended for lifting.

NOTE: OSHA requires contacting the manufacturer of your fork truck for written approval for the use of any fork truck attachments.
