Global Industrial™ Forklift Fork Leveler

★★★★★ (0)

Ships within 1 Business Day

Product Description

Aids the forklift operator in determining when the forklift forks are level.

The Global Industrial™ Fork Leveler is mounted in the eye-line of the forklift operator offering a clear and precise indication of the mast tilt angle. Leveler reduces pallet handling times by eliminating micro-adjustments of the tilt control when approaching a load, improving the performance of the driver. It also reduces potential pallet rack damage as well as damaged packaged pallet shipments. The fork leveler attaches onto most lift trucks in

less than 5 minutes using the universal hook-and-loop fasteners. **1 Year Limited Warranty.**
