Product Description

Molded Fiber Glass Tray 8082105167 ESD Lid For Stacking Box, 23-3/8"L x 12"W

ESD-safe stacking box Lids protect parts during storage and enable boxes to be stacked. Available in a variety of lengths, widths and depths. ESD Lids combine impressive strength, durability, and ease of handling with complete electrostatic discharge protection for sensitive parts. ESD-safe conductive products have a surface resistivity of less than 10^5 to 10^6 ohms. Fibrestat products meet or exceed ANSI/ESD S20.20 standard for ESD protection. And these lids possess superior physical properties over thermoplastic and corrugated products.

Fibrestat stacking lids may be consistently used in temperatures ranging from -60°to 250°F (-51°to 121°C) and are resistant to cutting oils, solvents, greases, and mild acids and alkaline solutions within a pH rating of 3.0 - 10.0. Composite construction ensures high load-carrying capacity and dimensional stability. For use with MFG-8082005167, MFG-8083005167, and MFG-8084005167 stacking boxes.

Specifications

Weights & Dimensions

Length	23-3/8 in
Width	12 in
Height	3-1/8 in

Product Details

Assembly Required	No
Type	Lid
Material	Fiberglass
Package Quantity	5
Color	Black
Manufacturers Part Number	8082105167
Accessory Type	Cover and Lid
Brand	MFG Tray

Warranty

Warranty	6 mo
