Product Description

Plastic Shipping Container - Hinged Lid Storage DC2012-07 19-5/8 x 11-7/8 x 7 Blue

Safe, Secure, and Sustainable. The improved all plastic attached lid container leads the industry in design and proven performance. Taken out was the traditional metal hinge – replacing it with a safer and more durable all plastic hinge. This series of plastic shipping containers is the choice of much of the distribution industry. Manufactured from high grade-high density polyethylene plastic, the enhanced storage container is made to ship, store,

and distribute goods and products in the toughest of environments. The all new plastic hinge design means there is no metal in the hinge of the container –making this container the safest and most sustainable in the market. Raised lip edges allow secure stacking. The attached lid container saves money too while allowing empty containers to nest inside each other when not in use. Molded grip handles have an integral hasp to accept cable ties for security. The **Best Value** plastic storage container offers increased safety and durability –all at a great value.

Add the optional **Dolly Bases** for easy transport of your plastic containers.
