

7-Outlet Advanced Power Strip

SC73T1

OVERVIEW

Elevate your entertainment center or home office with the Simply Conserve® Advanced Power Strip. Say goodbye to wasted energy from electronics left in standby mode and hello to smart, effortless control. Its load-sensing technology detects when your primary MASTER device (TV or computer) is on or off, automatically adjusting the outlets for your secondary SWITCHED devices (such as game consoles, DVD players, stereos, speakers, and monitors) to match. Plus, integrated child protective outlet covers and surge protection shield your most valuable possessions from undesired exposures to power. Enjoy the ultimate in convenience, protection, and save on energy bills—all with the Simply Conserve® Advanced Power Strip.

FEATURES

- **Effortless Energy Management**
Innovative load sensing technology effortlessly eliminates hidden energy use and makes operating entertainment centers and home offices more convenient by automatically switching outlets and devices on or off based on the status of a primary MASTER device (TV or Computer).
- **Ultimate Protection**
Integrated 1,440 joules of surge protection and child-safe covers.
- **Convenient Design**
Features like angled space-saver plug and heavy-duty 3 ft. cord make setup easy.
- **Clear Power, Quiet Performance**
Enjoy smooth device operation with our advanced power strip, featuring EMI/RFI noise filtering that reduces interference to less than 40dB.

EXAMPLES OF PRODUCTS THAT CAN BE PLUGGED IN TO EACH OUTLET TYPE:

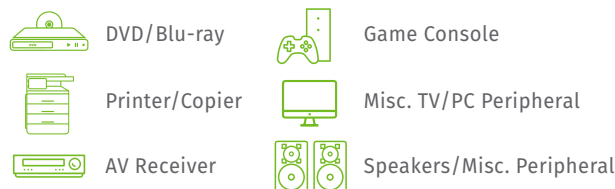

ALWAYS-ON OUTLETS:

HOW TO USE

Plug in any devices that require power at all times, like a modem or cable box. The power supply of these outlets is not dependent on the Master Outlet.

SWITCHED OUTLETS:

HOW TO USE

Plug in game consoles, DVD players, monitors or other peripheral devices. These only become energized when the primary device (in the Master Outlet) is powered on.

MASTER OUTLET:

HOW TO USE

Plug in your TV, desktop computer, or other primary device (not intended for mobile PCs) into the MASTER outlet. Load-sensing technology detects the current being drawn through this outlet—typically between 15 to 18 watts—to activate the SWITCHED outlets.
