

DIGITAL THERMOMETER

Our Digital Thermometer has an easy to read digital display screen that accurately shows Fahrenheit temperatures between -58°F and 158°F. The suction cup allows you to place the thermometer anywhere. This product can be used in a refrigerator and/or freezer as well as a hot water temperature gauge.

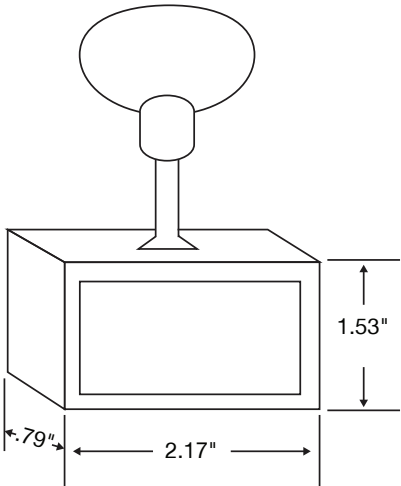

Adjusting refrigerator and freezer temperatures to the recommended settings saves energy and improves refrigerator/freezer efficiency up to 8%. The optimal refrigerator temperature range for food safety is 36°F to 40°F and a freezer should be set to 0°F.

THE FEATURES

- Easy to read display display
- Suction cup easily attached to most surfaces
- Batteries included
