

Earth Luxe™ Showerhead

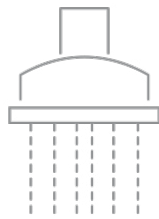

This showerhead is built with durable and attractive materials for an enjoyable and great-looking shower. It's available in six fixed-mount flow rates and three finishes. With the Earth Luxe™ Showerhead, a smooth and simple rotation switches the spray style. Conserve the energy used to heat water thanks to this head's non-aerated design. In turn, your customers save more money on their energy and water bills, and they are less likely to run out of hot water during showers—a win-win.

This showerhead is WaterSense®-labeled and available in matte black, chrome, and brushed nickel.
