

Fill Master™ Fill Cycle Diverter

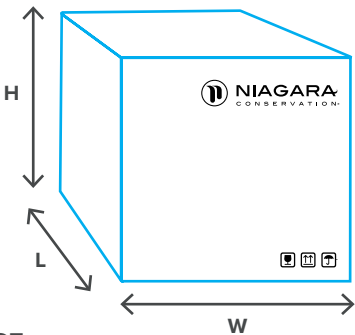

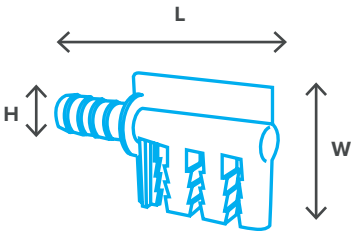

FCD010

OVERVIEW

The Fill Master™ Fill Cycle Diverter is a simple yet powerful upgrade for improving toilet water efficiency. By redirecting excess water from the overflow tube back into the tank during the refill cycle, it helps reduce water waste by up to 1½ gallons per flush. Ideal for retrofits, conservation programs, or budget-friendly home improvements, this easy-to-install device offers a cost-effective way to lower utility bills and promote sustainable water use—without sacrificing performance.

FEATURES

- **Efficient Water Redirection**
Helps minimize unnecessary water loss by channeling refill water into the tank instead of down the overflow tube.
- **Quick, Hassle-Free Installation**
Designed for easy setup without specialized tools—ideal for homeowners, maintenance teams, or conservation initiatives.
- **Cost-Effective Water Savings**
Delivers meaningful water reduction per flush, making it a smart solution for improving toilet efficiency on a budget.
