

## OVERVIEW

The Tri-Max™ Showerhead features three adjustable spray settings for optimal task performance and maximum water savings. The Tri-Max produces a luxurious shower with an even vacillating spray that requires up to 40 percent less water usage than typical “low-flow” showerheads. Simply twist the showerhead to match your desired task: 0.5 GPM flow rate for soaping, 1.0 GPM for showering, and 1.5 GPM for a powerful rinse mode.

## KEY FEATURES

- Select your flow rate based on desired water usage and task: 0.5 to soap and 1.0 or 1.5 GPM to rinse
- Pressure-compensating technology provides consistent output of water regardless of pressure
